

University Farm Highlights

Established in 1960, the University Farm is a diverse center of production, research and educational facilities promoting experiential student learning.

Programs strive toward sustainable resource management to ensure high-quality production from a healthy environment.

Welcome to the University Farm! The Paul L. Byrne Memorial Agricultural Teaching and Research Center is the living laboratory for agricultural classes and student projects. We also host dozens of events for the community each year, including educational field days, industry trainings, Farm City Celebration, and youth competitions.
