Glenn Hall Lawn- Accessible Set Up Information

To be used in conjunction with “Plan an Accessible Event” document

There needs to be an accessible/unobstructed path of travel around the perimeter of the event, and to the event activities. If a sidewalk is blocked, there needs to be signage that directs guests to an alternate accessible route. If electrical cords cross paths, they need to be covered with mats or secured with tape.

There needs to be a direct line of sight to stages from accessible viewing locations (i.e. view not obstructed by large signs or booths)

Booths and tables need to be on the perimeter of the lawn area, facing out, with direct access from the sidewalk/concrete. If the booth is intended to be entered, the entire interior needs to be on concrete or other accessible surface. If a sidewalk is blocked to allow access to an activity, be sure to provide a sign directing guests to alternate accessible route.

Recommended locations for booths/tables
Note: Booths need to allow 22 foot clearance on fire lanes

“Use Alternate Route”
