

# Student Services Center Plaza– Accessible Set Up Information

To be used in conjunction with “Plan an Accessible Event” document

<http://www.csuchico.edu/arc/documents/accessible%20event%208-2011.pdf>

There needs to be an accessible /unobstructed path of travel through the event and to event activities, and to the ramps near stage and to Marketplace. If a sidewalk is blocked, there needs to be signage that directs guests to an alternate accessible route. If electrical cords cross paths, they need to be covered with mats or secured with tape.

The SSC Plaza allows booths and activity tables to be placed on concrete creating full access.

Note: Booths need to allow 22 foot clearance on fire lanes

There needs to be a direct line of sight to stage from accessible viewing location. Since SSC Plaza is accessible, this should not present challenges.
