PRE-PROFESSIONAL PROGRAMS			
There isn't a "best" major to prepare students for professional school, as long as the prerequisite courses for entrance to the profession are completed. The major should be chosen on the basis of interest and as preparation for an alternate career. Specific preparatory course requirements vary for each professional school. You should inquire at the professional school of your choice for specific course requirements. The following pre-professional preparation programs and advising are offered at Chico and may be viewed in detail in the chapter(s) referenced.

ACADEMIC ADVISING

The university wants you to receive the academic advising necessary to plan courses of study appropriate to achievement of your goals in a timely matter. Your faculty advisor will either be assigned to you by your academic department or it will be up to you to secure one. The Office of Advising and Orientation maintains a list of advising coordinators in each academic program to whom you can be referred and can assist you with general program planning.

"Declaration and Change Of Program" forms (for declaring and changing an undergraduate major, option, or minor) are available in the Office of Advising and Orientation, MLIB 190. When you declare a program, preferably at your first opportunity, you are required to indicate as specifically as possible the major, and, when offered within the major, an option or pattern. In some academic programs, students who are declared majors have a higher registration priority than non-majors for registration. This priority may be a factor in obtaining the schedule of classes you desire.

What is an Option, Pattern, and Concentration? Some degrees may offer additional opportunities with both options and patterns within a major. The unique combination of any declared option and/or pattern (if offered) within your major is your "concentration." This concentration nomenclature is used on the Academic Programs Index and Four-year Plans on the Chico Web and is recorded on your student record. Your concentration also needs to be declared early in your career, and will be reported on the university database system and reports used by your academic advisor, evaluator or other staff who may be assisting you.
