**Why Major in Anthropology?**

There is perhaps no single field of study that can better prepare students to cope with the challenges of the 21<sup>st</sup> century than anthropology. Confronted with increasing global population, rapid technological change, rising tides of nationalism, and economic globalization, many look to the future with uncertainty. Anthropology provides understanding and answers based on a century of exploring the development of human nature, society and culture. It is the only social science that seeks to understand both human biological and cultural variation in the past and in the present. Encompassing a wide range of subjects spanning cultural and linguistic anthropology, physical anthropology, archaeology and museum studies, anthropology is unique among the many fields that study humanity.

The BA, MA and Honors programs in anthropology have been developed to provide the student with a broad perspective on human biological and cultural development. This is achieved through coursework in human biology and evolution, archaeology and prehistory, linguistics, folklore, and contemporary peoples in Western and non-Western cultures. Emphasis is placed on the acquisition of practical methodologies and analytical skills unique to the discipline. The Department of Anthropology creates a true learning community where excellent facilities are combined with close personal contact between students and faculty.

If you seek a major that will not only open up significant employment opportunities but also provides a sense of meaning and purpose in your life, consider majoring in anthropology. It leads to a more sophisticated, historically and scientifically grounded understanding of the relationship of human beings to the natural world, past and present. Anthropology majors develop an awareness gained through instruction and practical experiences of how culture shapes and reshapes our understanding of human problems and possibilities. Anthropology students are perhaps most distinguished by the realization that there are many of ways of engaging in the human experience, each equally valid.

**What Can You Do with an Anthropology Degree?**

Anthropology is an eminently practical major for those seeking a liberal education leading to a broad spectrum of career opportunities. Beyond the more traditional teaching and research trajectories, anthropology majors may select a course

of study to suit them equally well for examining the social impacts of a new federal program, or another, placing them on a remote hillside searching for ancient artifacts. Anthropology majors are finding positions in business, public and private agencies, education, museums, and public health programs. The Department of Anthropology offers four applied anthropology certificate programs.

**Certificate Programs**

The *Certificate in Cultural Resource Management* program prepares individuals for careers in the conservation, preservation and management of heritage resources located on public and private lands. Emphasis is placed upon acquisition of archaeological field skills and knowledge of federal and state requirements. Employment opportunities are plentiful.

The *Certificate in Forensic Identification* fosters student interest in applying scientific knowledge and skills of the physical anthropologist to legal issues (i.e., in an area of the forensic sciences). This program promotes both the development of important methods such as human skeletal identification and assessment in collaborative involvement with local law enforcement agencies.

The *Certificate in Museum Studies* prepares individuals for careers in municipal, county, and historical society museums, and state and federal interpretive centers. Emphasis is placed upon curatorial research and the design, preparation, and installation of exhibits.

The *Certificate in Applied Cultural Anthropology* prepares individuals for careers in private businesses and public agencies in the U.S. and abroad. Emphasis is placed upon identifying culturally related problem areas, research design, collecting and analyzing data, and policy analysis.

#### Electives Requirement:

#### Grading Requirement:

All courses taken to fulfill major course requirements must be taken for a letter grade except those courses specified by the department as Credit/No Credit grading only.

**Honors in the Major**

Honors in the Major is a program of independent work in your major. It involves 6 units of honors course work completed over two semesters.

Your Honors work will be recognized at your graduation, on your permanent transcripts, and on your diploma. It is often accompanied by letters of commendation from your mentor in the department or the department chair. Most importantly, however, the Honors in the Major program allows you to work closely with a faculty mentor in your area of interest on an original performance or research project. This year-long collaboration allows you to work in your field at a professional level and culminates in a public presentation of your work. Students sometimes take their projects beyond the university for submission in professional journals, presentation at conferences, or competition in shows; such experience is valuable for graduate school and later professional life.

Some common features of Honors in the Major program are

1. You must take 6 units of Honors in the Major course work. At least 3 of these 6 units are independent study (499H) as specified by your department. You must complete each class with a minimum grade of B.
2. You must have completed 9 units of upper-division course work or 21 overall units in your major before you can be admitted to Honors in the Major. Check the requirements carefully, as there may be specific courses that must be included in these units.
3. Your *cumulative* GPA should be at least 3.5 or within the top 5 percent of majors in your department.
4. Your GPA *in your major* should be at least 3.5 or within the top 5 percent of majors in your department.
5. Most students apply for or are invited to participate in Honors in the Major during the second semester of their junior year. Then they complete the 6 units of course work over the two semesters of their senior year.
6. Your honors work culminates with a public presentation of your Honors project.

While Honors in the Major is part of the Honors Program, each department administers its own program. Please contact your major department or major adviser for further information.
