The UO Master’s Industrial Internship Program

What It Is
This program combines concentrated classroom and laboratory instruction with a 9-month paid internship in one of these areas:

- Semiconductor Device Processing
- Advanced Organic Synthesis & Organometallics
- Polymers & Coatings
- Optical Materials & Devices
- Biotechnologies

What Makes It Special

- You can earn between $2000 and $5400/month during the internship.
- Over 90% of interns are offered permanent employment.
- The majority of our students finish their M.S. degrees in one year.
- M.S. degrees are awarded in chemistry or applied physics.

The Academic Requirements
A bachelor’s degree in one of the following:

- Chemistry
- Biochemistry
- Biology
- Physics
- Chemical, Electrical or Mechanical Engineering
