Course Description
This course fulfills a capstone and writing intensive requirement. This topical course is designed for students who wish to develop a broader and deeper understanding of children’s gender and sexuality development. Students study multiple theoretical explanations of gender and sexuality development, and learn how cognitive, social, cultural and influences impact concepts of gender and sexuality. Students examine political and social sources of discrimination and oppression as they relate to children’s psychological adjustment and consequences for parental rights. Students will apply their knowledge to their daily life, including personal identity, gender and sexuality expression.

Respectful Interaction with Others
One of the basic tenets (and requirements) of the course is that everybody be both open-minded and respectful of one another’s ideas and that we be non-judgmental while maintaining intellectual rigor. We assume that LGBTQ identities and issues are an important area of study. Regardless of any personal opinions held by professor or class members, we will not engage in the debate over whether they are “right” or “wrong”. Enrolling in this course means you will abide by these statements.

Child Development Mission Statement
Within the context of the broader university commitment to higher education, the Department of Child Development offers opportunities for students to engage in the purposeful acquisition and integration of child development theory, research, and practical field experience. Specifically, the program centers on learning the foundations of child development (prenatal through adolescence); assessing children and environments (developmental needs, behavioral guidance, home, school, community); analyzing developmental contexts (including gender, ethnicity, social class, family, peers, culture); applying critical thinking skills in personal and professional settings; and influencing character and behavior.
Child Development Vision Statement
Students in the Department of Child Development understand the development and environments that affect children and families. Students apply this knowledge, personally and professionally, in a variety of settings, including human services and education. Faculty facilitate students’ professional development by fostering collaborative learning environments that integrate high-quality teaching, mentoring, promoting scholarly activities, guiding relevant practical experiences, and modeling leadership. Graduates of the program are knowledgeable and reflective professionals with field experience, who recognize and value the uniqueness and diversity of children and families within and across multiple contexts.

Pathway Description
Gender and Sexuality Studies, is a pathway focused on the exploration of diversity and the development of critical thinking. Few of us are aware of just how complex and fascinating gender and sexuality actually are. Sexuality includes all aspects of our sexual desires, behaviors, and identities. This could include whom we are attracted to and why, what excites us, what we choose to do about that, and anything to do with biological reproduction. Gender, on the other hand, has more to do with social and cultural expectations, and we are bombarded by messages about gender everywhere—from our families, at our schools, and in the media for example. There are many stereotypes and assumptions about gender and sexuality, so we investigate related scientific, intellectual, and creative work. We come to understand how sexuality and gender are related to practically every academic major, profession, and aspect of life. We learn about the significance of promoting gender and sexuality for all people, including those who don’t fit neatly into the mainstream gender and sexuality identities of our culture, for example LGBTQ (Lesbian, Gay, Bisexual, Transgender, Queer/Questioning). Finally, in this pathway we can become more comfortable and sensitive working with a broad spectrum of people, thereby becoming more successful in our diverse world.

Software Required for this Class
The University supports Microsoft Word. University computers are not able to read documents created in WordPerfect or Pages. If you are creating documents on WordPerfect, it may be helpful to save them in Rich Text Format before sending, but this is not always successful and formatting is often not preserved—grades may be lowered for incorrect formatting on written assignments.

Fulfillment of GE Requirements
This course counts as a GE upper division social sciences course and as a writing intensive capstone course in GE.

Gender and Sexuality Studies Pathway SLOs covered by this course
Upon completion of this Pathway, students will be able to:

1. Identify, understand and discuss (orally and in written form) various theories, perspectives and methods of studying gender and sexuality.

2. Evaluate (orally and in written form) sexuality and gender as inherently connected to major areas of professional study, including history, politics, the media, sociology/social work, psychology, physical and mental health studies, medicine, scientific research, law and criminal justice, the arts, biology, international relations, cultural and religious studies.

3. Recognize and describe historical and current human rights movements that relate to issues of gender and sexuality.

4. Analyze as socially and ethically unsustainable the historical and current belief systems, institutions, politics and practices that maintain oppression and discrimination regarding gender and sexuality.

5. Apply knowledge of complexity of sexuality and gender in order to make informed decisions in all areas of daily life, including personal identity, gender expression, relationships, family, religion, profession, politics, recreation, and enjoyment of the arts.
6. Comprehend and respect the diversity of sexualities, gender expression, and gender performance in cultures and cultural expression across the globe.
7. Produce unique intellectual/creative work by utilizing technology, performance, artistic expression, scientific inquiry, academic or creative writing, and research.

**General Education SLOs**

The GE Program promotes student learning and engagement with academic course content conducive to developing intellectual and practical skills. This course addresses the following GE student learning objectives (SLOs).

**Written Communication**

GE SLO 2

*Demonstrates the ability to question, investigate and draw well-reasoned conclusions and to formulate ideas through effective written communication appropriate to the intended audience. You will have the opportunity to write in various forms of expression for this course, including discussion posts, activities, and an integrative paper. You will have the opportunity to write about your own experiences with gender and sexuality, real world sources of information about gender and sexuality, and to integrate various perspectives of gender and sexuality.*

**Critical Thinking**

GE SLO 3

*Identifies issues and problems raised in written texts, visual media and other forms of discourse, and assesses the relevance, adequacy and credibility of arguments and evidence used in reaching conclusions. In this course, you will analyze, synthesize, and evaluate perspectives of gender and sexuality, including social, cultural, cognitive, and biological perspectives. You will have the opportunity to evaluate current societal perspectives of gender and apply current social policy to issues of discrimination and oppression. Although you will have opportunities for critical thinking as the course progresses, this SLO is assessed through activities and the capstone assignment.*

**Personal and Social Responsibility**

GE SLO 6

*Demonstrates knowledge and skills necessary to take responsibility for one's own life and actions, and to recognize opportunities and responsibilities to become engaged in our various local, regional, national, and international communities. You will have the opportunity to recognize unsustainable values, norms, perspectives, and practices that marginalize individuals as a result of their gender and sexuality. You will identify sources of your own biases and stereotypes and will be given the opportunity to develop a more fluid and inclusive view of gender and sexuality. This SLO will be assessed through selected discussions and the oral presentation.*

**Student Learning Objectives for this course:**

1) Students will compare and contrast theories of gender and sexuality development, including real and mythical gender differences.
2) Students will investigate gender role expectations and stereotypes in real world settings and will apply their experiences to personal identity, gender and sexuality expression.
3) Students will compare and contrast cultural values and norms regarding gender and sexuality.
4) Students will identify influences of peer segregation on gender development, and explain developmental changes in establishing gender identity.
5) Students will modify a dichotomous (male versus female) view of gender to include inclusive and fluid expressions of gender.

6) Students will identify biological processes that contribute to sex and gender, including genetic, neurodevelopmental, and hormonal influences and variations in chromosomal expression.

7) Students will demonstrate comprehension of contemporary professional responses to genetic and biochemical variations in sex, and its impact on gender and sexuality development from infancy to adolescence.

8) Students will evaluate current unsustainable political and social sources of discrimination and oppression regarding GLBTQ youth and their families.

9) Students will appraise current social policy movements regarding limiting or expanding rights for GLBTQ parents and the ability of individuals to foster parent and adopt children.

Course Content Learning Outcomes
The following grid tells you how this course meets specific learning objectives of the Gender and Sexuality Studies pathway and the GE program, and how the learning objectives are assessed. Upon successful completion of this course, students will be able to:

How to Contact Your Professor
All email correspondences should be through Bb Learn messages. You will get a much faster response, as I will recognize your name as a student in my class and give you priority. You may visit me without an appointment on campus during my office hours. You can chat with me or call me at 530-898-5578 during office hours. Don’t hesitate to call; I like putting a voice with your name. You may also email and arrange a time to talk if my office hours aren’t convenient for you.

Attendance in the Course for Online Students
Your instructor understands that online students choose this form of education so that they can attend higher education from a distance, continue to work, raise families, and attend classes simultaneously (or any combination of these). Online students are not required to be logged into the class at specific times during the day. It is essential that students make timely progress throughout the course. There are readings that are assigned, and class assignments that are due, so not logging in regularly will put
a student very far behind and make it hard to keep up. Daily progress is crucial for success in this class.

Course Usage of Blackboard Learn – This is very important!
Copies of the course syllabus and major assignments may be found online in the course. You are responsible for regularly checking the online resources, which are accessed through the Portal. Plan to log on at least once every day (except holidays). If the portal is down or not working, you can access Bb Learn through the TLP website at this link TLP.

Required Readings
Required readings are located in Blackboard Learn. You are responsible for making sure that you can open the readings. If you can not open a reading, contact student computing. A complete reading list with assigned dates is in the course schedule online.

Other Equipment Requirements
Students are required to record a video presentation of themselves. Some computers come all ready equipped with this technology. Fulfilling technology requirements is the student’s responsibility. The oral presentation requirements will not be altered to accommodate a student’s computer issues. If you have any questions please contact the computer help desk.

Student Responsibilities
1. Students are responsible for knowing the content of the syllabus and the course schedule.
2. Students are responsible for knowing university policies regarding plagiarism. Students are expected to turn in original work that was completed independently unless otherwise indicated in individual assignment instructions (group work).
3. Students are responsible for submitting assignments by the due date. If you anticipate computer problems, make sure to submit before computer help desk closes, so they can help you in the event of a problem. Students are responsible for contacting the computer help desk in the event that you experience technical difficulty. This contact information is on the course page. I can not solve your computer problems. Write this number down and keep it near your computer in the event that you can't access the internet.
4. Students are responsible for being aware of messages that the instructor sends to you. You should check for announcements and messages on a daily basis, Monday through Friday.
5. Students are responsible for submitting assignments in the format designated by the university. The university supports MS Word. If your computer does not support this format, then you can submit in .rtf. Do not submit documents in .wps; submissions in this format will not be graded. These submissions will receive a “0.”
6. Students are responsible for being able to navigate Blackboard Learn to the extent that is required in this course.
7. Students are responsible for fulfilling technology requirements.

Instructor Responsibilities
1. The instructor is responsible for answering your questions in a timely manner. Most emails and phone calls during the week will be answered in 48 hours. Emails and phone calls over the weekend may take up to 72 hours. Do not expect me to be online after 5 pm.
2. The instructor is responsible for being available during office hours.
3. The Instructor is responsible for creating a positive learning environment. I will make every effort to create an atmosphere conducive to student engagement. This includes my interaction with you and student to student interaction.
4. The instructor is responsible for grading assignments in a timely manner. In most cases I will be able to get assignments back to you within 14 days.
Internet communication
Please be respectful of your fellow students. You will be communicating with each other on the discussion board. Do not type in all capital letters; this is interpreted as yelling. Type in sentences and edit before you submit. Please be sensitive and do not communicate sexist, racist, or discriminatory comments or you will be referred to Student Judicial Affairs.

Dropping and Adding
You are responsible for understanding the policies and procedures about add/drops, academic renewal, etc. found Catalog. You should be aware of the new deadlines and penalties for adding and dropping classes.

Assignments and Grading Policy
Make-ups, late submissions of student work, and extra credit
Assignments and activities received after the due date will be penalized 10% per day late; weekend days are counted. No assignment will be accepted for credit more than 48 hours after its due date. If you are sick the day an assignment is due, get a doctor’s excuse to avoid a penalty for turning in an assignment late due to illness. Otherwise, late penalties apply. All make-ups must be completed by the last day of class or a “0” will be assigned for missed work. No assignment will be accepted during finals week.

There are no make-ups for missed discussions or quizzes.

Total points will be converted to an overall percentage to determine your final course grade.

Discussion Topics:
I will post discussion topics relevant to course content through the discussion tab. Students are required to provide a 250 word (minimum) response to the discussion topic and respond to a fellow students’ discussion response (100 word minimum).

Activities:
Activities are 2 page written assignments involving real world applications of content learned in class and are relatable to students’ personal experiences. Instructions are accessed and completed assignments are submitted through the Assignments link in the Content Area Folder.

Capstone Assignments:
The capstone assignments are composed of multiple components. The objective is for students to synthesize information learned throughout the course. Students will complete a visual electronic collage and written expression of gender and sexual identity/expression. Students will also create an oral presentation that will include current research supporting social and personal responsibility and social policy change. Requirements for the assignment and submission instructions are located in Bb Learn content area folder.

Quizzes:
Quizzes are non-cumulative, open book, multiple choice and true/false questions based on the course content (readings, weblinks, and videos) for the assigned topics. Study guides in each content area
will help students prepare for the content on the quiz. Quizzes are accessed through the quiz and study guide folder. Students are expected to take quizzes as individuals; collaboration on a quiz constitutes cheating. Students may not share the quiz questions or their answers to quiz questions with other students. This constitutes unauthorized access to test materials; these students will be reported to Student Judicial Affairs.

*Please see specific instructions for each course requirement for information on how to submit and how each assignment is graded located in Blackboard.*

*Please see the course schedule for due dates for course requirements.*

**Total points earned in the course will be converted to a percentage. Final grades will be calculated as follows:**

University Policies and Campus Resources

**Academic Integrity**

Have integrity. Unless otherwise indicated on individual assignment instructions, all student work is expected to be original and completed independently. Students are expected to follow university policies for academic honesty, and are expected to report to me classmates who violate university policies. Copying another student’s work of any kind, helping another student cheat, cheating on a quiz or having unauthorized access to quiz material and assignments constitutes violations, and such students will be reported to university authorities. Plagiarism involves copying material or ideas and presenting that material as if it were your own, without appropriate citation or quotation marks. This includes internet sources and papers that other students have written. Misuse of sources includes incorrect citation of a source, such as failing to provide quotation marks or page numbers in copied material. Students who plagiarize, misuse sources, cheat on quizzes or assignments earn a “0” for that quiz or assignment, and will be referred to judicial affairs. Students who plagiarize, misuse sources, or cheat on 2 or more requirements will earn an “F” for the course. Students are expected to be familiar with the University’s Academic Integrity Policy. Your own commitment to learning, as evidenced by your enrollment at California State University, Chico, and the University’s Academic Integrity Policy requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the Office of Student Judicial Affairs. The policy on academic integrity and other resources related to student conduct can be found at: [SJA](https://sja.csuchico.edu)

*Please note this wording is taken from the judicial affairs website:*

1. All written work is to be individually produced unless otherwise noted in the assignment.
2. Plagiarism is the use of the written work of others (either direct copies or close paraphrases) as one’s own original work. If quotations and/or passages from other works are used in papers, they must be accorded the proper citation in order to avoid any misunderstandings about plagiarism.

When there is evidence that a student has committed plagiarism, copied the work of others, allowed others to copy their work, cheated on an exam, altered class material or scores, or has inappropriate
possession of exams, or sensitive material, the incident will be investigated by Student Judicial Affairs. The consequences for academic dishonesty are severe.

**Academic Honesty as it relates to all student work**
All assignments, quizzes, exams and writing are expected to be individually produced without assistance from others unless otherwise noted in the assignment.

**Title IX: Confidentiality and Mandatory Reporting**
As a Chico State instructor, one of my responsibilities is to help create a safe learning environment for Chico State students. It is my goal that you feel able to share information related to your life experiences in classroom discussions, in your written work, and in our one-on-one meetings. I will seek to keep information you share private to the greatest extent possible. However, I am required to share information regarding sexual misconduct with the University.

Students may speak to someone confidentially by contacting the Counseling and Wellness Center (898-6345) or Safe Place (898-3030). Information about campus reporting obligations and other Title IX related resources are available here: [Title IX](#)

**Disability Services at the Accessibility Resource Center (ARC)**
If you have a documented disability that may require reasonable accommodation, please contact the Accessibility Resource Center (ARC) for coordination of your academic accommodations. They can be reached at 898-5959. Information about their services can be found at [ARC](#)

**Student Computing**
Computer labs for student use are available [LABS](#) located on the 1st floor of the Merriam Library room 116 and 450, Tehama Hall Rm.131 and the BMU Room 301. Additional labs may be available to students in your department or college.

**Student Services**
Student services are designed to assist students in the development of their full academic potential and to motivate them to become self-directed learners. Students can find support for services such as skills assessment, individual or group tutorials, subject advising, learning assistance, summer academic preparation and basic skills development. Student services information can be found at: [Student Services](#)

**Student Learning Center**
The mission of the Student Learning Center (SLC) is to provide services that will assist CSU, Chico students to become independent learners. The SLC prepares and supports students in their college course work by offering a variety of programs and resources to meet student needs. The SLC facilitates the academic transition and retention of students from high schools and community colleges by providing study strategy information, content subject tutoring, and supplemental instruction. The SLC is online at [SLC](#). The University Writing Center has been combined with the Student Learning Center.
