Bring Your Own Device

Several campus classrooms offer only a TV and DVD/VCR for media presentations. As more students and instructors want to share content from mobile devices such as the iPad, this learning space option provides a cost-effective way for a more media rich classroom experience.

The Concept:
Small Learning Space

The small learning space provides faculty and students with video and audio connection points to present on an LCD TV or short-throw projector. Users must bring their own mobile device present.

Projector Cart Configuration

This includes a cart with a short-throw projector mounted on top. The cart will have connection points for media devices, a device controller and a speaker.

**Pros**
- Few changes required to classroom infrastructure

**Cons**
- Projector may lose focus as cart moves in room
- Projector blocks access to whiteboard when in use
- Whiteboard may need to be replaced or moved

**Equipment Costs**

<table>
<thead>
<tr>
<th>Equipment</th>
<th>Cost</th>
