Sacramento River Floodplain Ecology Institute

July 25-27, 2016 + 1 day in fall: Nov. 5 2016

For K-12 Teachers (with breakouts by grade band)

Water issues impact much more than human usage. Learn how the entire watershed system is affected by human activities and rainfall patterns.

Next Generation Science and Engineering Standards and Project Based Learning

Program Features

A. Instructional Materials: Handouts and lesson plans, the excellent new Project WET curriculum guide

B. Raft Trip on the Sac River: study restoration of the river and the impact of flood control designs

C. Network: priceless contacts and valuable connections to other teachers of science

D. Common Core: Standards in English Language Arts will be integrated throughout; reading comprehension strategies, academic writing and discourse for EL will be included using adopted instructional materials.

Teacher Stipend $200 Must attend ALL days, including November 5. Stipends are not pro-rated.

Registration fee = $55

2 units of credit available for purchase ($60/ea).
