

## Telephone headsets

### General information

TSRV has available several styles of headsets for campus telephones. Please read the following information as a review of what devices are needed for digital and analog phones.

To begin with a decision needs to be made as to whether the phone will be answerable while the user is away from the desk or not. This option requires a handset lifter with most styles of headset devices.

Another decision is if the headset will be an over the ear style or an over the head style.

Obviously one important issue is the cost factor. Generally the more features the more expensive the headset device.

Please note that none of these headsets allow an outgoing call or call transfer without using the telephone keys.

We provide an evaluation unit for most of the headsets we list, but we do not always have all the styles in stock for evaluation. This is a “check out” program requiring a service request to USRV for a headset evaluation, no CAF required.

## Telephone Headset devices

### Avaya ABT-35 Bluetooth Headset System

Enjoy wireless freedom in the office or on the go with the Avaya ABT-35 Bluetooth Headset System. Ensuring lightweight, all-day comfort, the ABT-35 delivers superior sound quality and provides WindSmart technology for clear voice transmission. At the touch of a button you can seamlessly switch between office phone and voice-enabled Bluetooth mobile device.

\$224.50

- The ABT-35 has an internal electronic hookswitch and does not require a handset lifter
- It is compatible with Avaya 2410, 2420 telephones.

**\$289.50**

The Plantronics CS55 wireless headset system combines the clarity of traditional corded technology with the mobility of wireless, so employees can move around the office to wherever business takes them—without interrupting or missing a call. Continuing our tradition as a technology leader, Plantronics presents CS55 as the first headset in the United States to implement 1.9GHz UPCS voice-dedicated wireless technology. With the included Plantronics HL10 handset lifter, remotely taking or ending a call is as simple as pressing a button. Includes the Plantronics HL10 handset lifter for remote call answer/end capability.

- Includes both ear-hook and headband adapter for user comfort.

**GN-9125**

**\$241.60**

The Jabra GN9125 is a wireless headset that works the way today's in-office professionals work. Offering an unbeatable range of personal mobility in the office, a robust talk time and a host of innovative features and benefits, the revolutionary GN9125 will give complete wireless freedom in the office.

GN9125 operates on the 1.9GHz radio frequency band, which is a reserved channel for telecommunications equipment using DECT 6.0 technology – providing low interference and high quality audio.

If you require the ability to answer or hang up a call while you are not at the telephone you will need a **GN-1000** handset lifter.

The GN1000 Remote Handset Lifter is the perfect accessory for your GN Netcom wireless headset system. With the GN1000, you can answer and end calls, from wherever your wireless headset takes you. It's easy to install, and its one-button operation means ease of use.

- This handset lifter is only for the Jabra units.

\$55.63

HL10 handset lifter fits on your telephone, letting you answer calls with the touch of a button, conveniently and automatically takes your handset off hook.

- This handset lifter is only for the Plantronics units.

\$64.90

We also have **wired** headsets available, the popularity of these designs has dropped off significantly therefore we are not restocking them. We do have some components available and will be happy to order whatever you may need.

You may wish to find a product different from our offerings, so I am listing links to these manufacturers sites for your convenience.
