

ADVANCED COURSE SUBSTITUTION

EM 21-023: A student may substitute a more advanced course for an Area A or lower-division Area B course. For example, a student might take MATH 120 Analytic Geometry and Calculus, substituting it for a lower-level GE mathematics course such as MATH 101 Patterns of Mathematical Thought. CAB will keep a running list of acceptable course substitutions and administer this process in consultation with appropriate disciplinary faculty.

Date Submitted:

Department:

GE Area	Proposed Advanced Course(s)	Rationale
Example: B-4(Quantitative Reasoning)	MATH 107, 108, 109, 110, 111, 118, 119,120	Each of these courses provides more advanced training in mathematics than the GE Math courses: MATH 101, 105.

***Please attach a syllabus for each course proposed as an Advanced Course Substitution.**

If approved, Advanced Course Substitutions will be valid for five years and then reconsidered at that time. Substitute courses fulfill appropriate GE requirements, but cannot be accepted as course associations for Pathway Minors.

The proposed Advanced Course Substitution(s) has been reviewed and approved by the Department Curriculum Committee.
