**Note 1:** **ScreenGrab** does not work on Macintosh OSX. To use ScreenGrab on a Macintosh you must be running OS 9.

**Note 2:** The **HorizonMedia Audio Controller** does not run on Mac OS 9 or Linux, because there is no SecureDoor installer for those OS. These users can participate using the telephone broadcast/simulcast, if available. Mac OS 9 and Linux users will be able to participate in 1-way sessions using RealPlayer or QuickTime.

**Note 3:** Presenters cannot run **Application Sharing** on Mac OS 9 or Linux. However, participants can view Application Sharing sessions on OS 9 or Linux.

**Note 4:** Internet Explorer 5.2 is not recommended for Mac OS X when there is **Application Sharing** during a presentation.
