

January 11, 2008

Dear Neighbors:

Subject: Installation of underground electrical utilities at Legion Avenue - Closure Notification

As you know, the University has been diligently working with PG&E to move the utilities underground on Legion Avenue as was requested by many of you. In order to install the power underground, PG&E will need to close Legion Avenue Monday through Friday from 8 am to 5 pm for 3-5 weeks beginning in late January 2008. Traffic control will be provided by PG&E.

We would also like to let you know that installation of the site fencing around the construction site occurred on campus the week of January 2, 2008, with demolition of the existing recreation building began the week of January 7, 2008. The site fencing eliminates the roadway from Tehama Hall to Legion Avenue.

We appreciate your patience and cooperation as we construct a building that represents our collaborative efforts.

If you have any questions or concerns, please contact me at (530) 898-6235 by Tuesday, January 22, 2008 so that we may resolve any issues before the work begins.

Sincerely,

A handwritten signature in cursive script that reads "Glenda E. Morse".

Glenda E. Morse
