**Student Research Grants**

The Colorado Scientific Society (CSS) invites students at accredited colleges to apply for our student research grant program. CSS has six established memorial funds that are supported by the gifts of members and friends. We have funded over 200 students since the inception of the grant program in 1984. Total grant funding is typically between $8,000 and $11,000 per year, with an average student award of ~$800. The majority of our grants go to graduate-level research, although we often fund deserving undergraduate proposals as well.

**WHO IS ELIGIBLE**

- Graduate students and junior or senior undergraduate students at accredited universities.

**APPLICATION**

- The grant application, appraisal of applicant, and grant policies and procedures can be found at:
  - [coloscisoc.org/grants](http://coloscisoc.org/grants)

**DEADLINE- MARCH 31, 2017**

- Please submit all materials to Peter Barkmann:
  - barkmann@mines.edu
- In the email subject line please put “CSS 2017 Grant Application” or “CSS 2017 Appraisal of Applicant.”

The Colorado Scientific Society was founded in 1882 as a forum for the exchange of observations and ideas on the topics of earth science. Our lecture series occurs on the third Thursday of each month, from September through May. Lecture topics largely focus on earth science, and are open to the public.

In addition to our monthly lecture series, the society is also active in public service. We fund student research grants, construct and post signs that describe local geologic features, and organize and lead several field trips.

For more information on the Colorado Scientific Society and upcoming lectures, see: [www.coloscisoc.org](http://www.coloscisoc.org)
