

Chico Green Campus Program

Green Campus Program Resolutions

With the start of a new year comes many new goals to accomplish. This year, 2007, the Chico Green Campus Program has a long list of new objectives.

Our major goals for the new year are:

- Complete revamping Knonkow #2 House for a grand opening and tour in March. The GCP would like to have a new refrigerator, sensor lights in the bathroom, a new flat screen monitor for the computer, and maybe a compost pile or worm bin.
- Finish installing our Power Management Software in most of the computer labs on campus. We would also like to have a major press release on our achievement at lower energy consumption. From this we hope other schools, businesses, and organizations can see how easy and beneficial this process is.
- Finish installing computer monitors in Lassen and Shasta Halls, so that the residents can see everyday how much energy they are using. This monitor will show them their real time energy consumption as well as their overall energy consumption. After this installation, we hope to have an-

other outstanding energy competition in the Spring.

The Alliance to Save Energy's "Green Campus Program" is funded by the ratepayers of Pacific Gas & Electric. Strategic Energy Innovations is a sub-contractor of the Green Campus Pro-

- Recruit more students into the GCP. Many of our existing interns and staff will be graduating, so a major goal for us is to recruit many more members that will keep GCP going strong for many more years.
- Continue our success with the Green Cup Cards. Announce another raffle to excite and get more faculty

and students involved.

- Educate and discuss topics such as energy conservation and behaviorisms in other residents halls. We also want to somehow bring a type of competition or contest into the other residents halls. Some ideas such as LEED your room, were residents can get points for how energy conscious and sustainable their rooms are.
- Get the Greek system involved with reducing their energy consumption as well. We hope to be able to work with the sororities and fraternities to also make a change in their behaviorisms when it comes to energy.
- Publicize more. In everything we accomplish we hope to publicize more about it. We want our fellow peers, community, and others to see what we are doing and who we are. We hope from this, we will gain more support and involvement from everyone.

The GCP is very excited for a new year, a new start, and many new goals.

Green Campus Interns

We Want You!

After the enormous success of the Green Campus in the last years at Chico State, we would like to invite any interested students to join.

Chico State's Green Campus is one of the largest in California, and with all the exciting events coming up next year, involvement will be fun, educational, and rewarding.

We would be happy to work with volunteers or students interested in internships. There are one, two, or three unit internships available, and plenty of work to

do! We have many new and old projects to work on this semester, so help is needed. Remember, all disciplines are welcomed and encouraged to join. If interested,

please come by the Green Campus office in 517 Butte Hall or contact Joanne Panchana at [greencampuschico@sbcglobal.net](mailto:green-campuschico@sbcglobal.net). Thank you!
