

Tabling Event Planner

The tabling event planner will coordinate participation by Green Campus in any tabling events hosted by other organizations and for Green Campus events. You will work along side the PR specialist for publicizing all events and event handouts. You will also serve as the contact for other organizations contacting Green Campus about participating in other events. They will need to organize interns to and tabling items. The ideal candidate will be someone who is well organized and detail oriented.

Captain Energy Mascot

We are looking for an enthusiastic individual who would love to learn more about sustainability and energy efficiency. As Captain Energy, you would not only need to attend events hosted by Green Campus and other tabling events (in our comfortable Captain Energy costume) but would also need to have some working knowledge of energy efficiency and sustainability. Green Campus will supply both the training needed to become more knowledgeable about the subject as well as provide the costume. This is a fun and different way to learn and educate others about sustainability.

PR Specialist

As the PR specialist, you will serve as advocates for the Chico Green Campus Program, build and maintain positive relationships with the public and attempt to gain a wider reach of media coverage. You will send out press releases for large events and projects and maintain our Green Campus Facebook and MySpace page. The ideal candidate will be professional and somewhat knowledgeable about sustainability, energy efficiency or Green Campus.

Shasta/Lassen Energy Competition Coordinator

As the coordinator for this project you will be the primary contact for RAs and resident hall coordinators. You will coordinate the month-long event where each hall competes with themselves to win a party for their dorm by reducing their energy intake. You will have to coordinate the event from start to finish and organize Green Campus interns to help with the parties (if earned) at the end of the competition.

*In order to obtain one of these positions you will need to sign up for a two or three unit internship with Green Campus.
