

## Captain Energy

Chico Green Campus' Captain Energy is

here to show us how to combat energy wasters — one kilowatt hour at a time!

Conquering the wasters of the world, Captain Energy shows us all that saving energy can be easier than we think.

Captain Energy helps us see that conserving energy is as easy as making a few simple changes in our everyday lives.

By unplugging unused appliances, using natural light whenever possible and

stepping up to power down energy wasting equipment, we can all help Captain

Energy beat the energy wasters on campus and at home.

**Come and meet  
Captain Energy at Green  
Campus events on the  
Chico State campus!**

BMU 301

# CHANGE

## Intern with Green Campus!

**Your Future is Calling!**

## Change Your Education

The Alliance to Save Energy's Green Campus Program is funded by the California ratepayers under the auspices of the California Public Utilities Commission, Southern California Edison and the UC/CSU/IOU Energy Efficiency Partnership.

Thirteen Green Campus programs on UC, CSU, and private university campuses are working toward campus energy efficiency through encouraging practices that will save energy, lower institutional costs, and protect the climate.

The Chico Green Campus office is located in BMU 301 and is home to other environmental organizations, including EARC, AS Recycling and AS Sustainability.

Students interested in interning with Green Campus can go to BMU 301 for more information or e-mail us at [GreenCampus@csuchico.edu](mailto:GreenCampus@csuchico.edu)

## Change Your Campus

Interns at Green Campus have fun planning on-campus events and programs and make a real difference on campus!

Some of our projects and events include:

- \*Greeks Going Green
- \*Residence Hall Energy Competition
- \*Turn Off the Lights, Open the Blinds faculty and student challenges
- \*CFL Exchanges

---

“Green Campus is really open to anyone from any major, and it gives the interns a better understanding of our environment.”  
— Mahmou Saad,  
Green Campus Intern

## Change Your Future

As Green Campus interns, students not only get to have a lot of fun implementing their own energy efficiency ideas, they also get to go to really great conferences and learn a many new things about the energy and sustainability field.

Interning with Green Campus looks great on a resume and definitely gives you a leg up in the emerging “green” job field. Many Green Campus interns go on to get jobs in the energy field right after graduation.

## Your Job as an Intern

Green Campus offers one to three unit internships beginning each semester.

Interns are required to attend weekly meetings as well as help plan and execute a variety of Green Campus events and projects. Some interns may have the opportunity to become paid staff members.
