CHICO GREEN CAMPUS ACCOMPLISHMENTS FACT SHEET

PACIFIC GAS & ELECTRIC CO.

- Chico Green Campus received a \$50,000 grant from PG&E for saving California State University, Chico money by conserving energy through projects on campus.
- The project specifically responsible for the grant is the power management software called EZ GPO that Green Campus installed in computers to shut them down into hibernation when they are not in use.
- CSU, Chico saved over \$100,000 annually on their energy bill using power management software.

SUSTAINABILITY HOUSE

- The Sustainability House is a residence hall that was retrofitted to be completely energy efficient.
- Students who live in the house are taught how to cook with organic foods, clean with sustainable cleaning supplies and personal products and all appliances and lighting are energy efficient.
- The Sustainability House also includes a worm bin for composting and meters that allow the students to monitor their energy use.

RESIDENCE HALL ENERGY COMPETITION

- This competition is set up between Shasta and Lassen Residence Halls that target first-year students to reduce their energy consumption.
- Students can see meters installed in both Shasta and Lassen Halls to see who is saving more energy.
