

The purpose of this survey is to examine the relationship between academic and civic engagement, and students well-being. Research has shown engaged students have higher levels of well-being. Student ID is being collected so we can match your responses to first-year programs such as Course Link and University Life. Results will be reported by groups only. No individual information will be released. Your responses will help us improve programs for future students. Your participation in filling out the survey is voluntary. You may skip questions you don't want to answer or end your participation at any time, though complete surveys will be very helpful to our efforts to improve our programs for students. Thank you for your help!
