SUBJECT: Computer Refresh Project

On behalf of the University Technology Advisory Committee (UTAC), I endorse and emphasize the significance of continuing our campus *Computer Refresh Project*.

Our campus community is well-aware of the severe budget cuts our University is currently experiencing. UTAC is eager to work with you so that collectively we can develop and implement a *Computer Refresh Project* that will support our first strategic priority – student learning – and our business processes, both of which are crucial in sustaining our mission to serve Northern California, our state and nation through excellence in instruction, research, and public service.
