Faculty and Facilities

The faculty have strong preparation in many fields of mathematics plus a commitment to excellence in teaching. Individual members are involved in a number of exciting and creative efforts: computer applications of math, applications of math in business and economics, statistical research in biology and medicine, research in various areas of pure mathematics, innovative approaches to teaching at the collegiate, secondary, and elementary levels. Students have the opportunity to participate in these challenging programs.

Many classes make use of graphing calculators and/or computers. The department maintains a well-equipped computer laboratory open to all mathematics students. In addition, the department has a tutorial laboratory where students can get help on course-related material.
