How did the MESA Engineering Program (MEP) help you?

MESA helped me by encouraging organizational involvement which helped me become a better leader, build confidence and gain hands on work experience in my field.

Favorite Chico memory: I have many great memories, but my favorite Chico memories were when I was participating in organizations accomplishing great goals, putting on huge events and just being part of something bigger than myself.

Amber Armstrong working on a web development project during her 2006 summer internship with Intel Corporation. **Amber has received \$4,500.00 in scholarship funds from the MESA Program.**
