LTC Academic Chair 2004/2005

Eta Kappa Nu Member

Graduation Year: Spring 2006

Current Employer: Chevron Information Technology Company

Job Title: Information Technology Professional for Integrated Global Support Western Division

Job Description: Provide desktop support for Chevron's Global Information Link (GIL) PC's in San Francisco and Concord. Involved with GIL hardware deployment in Anchorage, AK and other site to come.

How did the MESA Engineering Program (MEP) help you? MEP helped me in many ways ranging from financial support to providing an excellent study environment. The MESA Engineering Program helped me make a successful transition from High School to College. The MEP staff helped me get involved with student organizations from which I made life time friends. I am very thankful for all the support and motivation that I received from everyone in the MEP staff and the program. A special thanks to Lupe Jimenez for helping me become a successful student leader and now a Chico Alumni.

Did you receive any Scholarships from the MESA Program? Yes MANY Scholarships!!

Advice for current Chico State MESA students: Get involved with student organizations. Be able to work outside of your norm and be open for change.
