

# MESA ENGINEERING PROGRAM (MEP)

## Graduate Profile

**Name:** Mario Alberto Solis

**Major:** Construction Management

**Student Organizations:**

ASC- 2005 Reno Construction Competition; Placed 2nd with the Mechanical–Electrical-Plumbing team

ASC– 2006 Construction Competition

**Graduation Year:** Spring 2006

**Current Employer:** Rudolph Sleeten Inc.

**Job Title:** Project Engineer

**Job Description:** Specialized with different trades, review submittals from subcontractors, write Request for Information (RFI's), prepare sub-contracts, prepare Purchase Orders (PO), prepare Meeting Minutes, write daily reports and prepare Potential Change Orders (PCO).

**How did the MESA Engineering Program (MEP) help you?** The MEP program helped me in many aspects. One of them is that MESA always provided tutors and scholarships. I received a scholarship in 2005 and 2006, which I thought it was a great help financially during my school year.

**Favorite Chico memory?** One of my greatest memories that I have from Chico State is socializing with all my friends on campus. Another great memory is going to all my Construction Management classes, even though sometime I would have a lot of home work and stress out I enjoyed the education I received. Now that I am working professionally, I realize that I have to spend more time at my job performing more work than in school, and sometimes I even stress out, but I also enjoy it because everyday is a learning process. Even though there is a big change from school to work there is nothing better than going to school so I hope you enjoy every minute of it.

Mario Solis on the Job site with Rudolph and Sleeten September 1, 2006

**Mario received a two year NSF Scholarship worth \$6,250.00 from MESA.**
