

Application for WISE¹ Lab Access

*Administered by NeWT², under the direction
and guidance of the WISE Project Directors*

WISE Project Mission Statement

The mission of the WISE Project is to provide curriculum and laboratory improvements aimed at improving retention of women in computer science and engineering majors. This mission promotes healthy professional interaction and understanding between women and men in computer science and engineering. The focus is on activities and environments present within the classrooms and labs, but it is desired that such professionalism will continue beyond the classrooms and labs. The WISE Project also seeks to provide networking opportunities for women with professionals in government, academia, and industry. Furthermore, the project seeks to provide space, equipment, material resources, and a safe and healthy environment conducive to learning, for women in computer science and engineering disciplines.

The WISE Lab supports this mission by providing a place where women in computer science and engineering can go to work and talk to other women and mission supporters, in a collaborative and congenial atmosphere. Applicants will not be discriminated against based on race, religion, gender, or ethnicity.
