School of Nursing
Course Information – Semester 2
Spring 2019

Fall classes begin on January 22, 2019.
Faculty will use Blackboard (Bb Learn) to communicate with students regarding orientation and other class information.

Clinical Requirements – This is extremely important. Updates of all clinical requirements are due to CastleBranch by Wednesday, January 2, 2019 (Subject to change...check School of Nursing website). These requirements include updating proof of health and auto insurances (make sure your name appears on the submitted policy), as well as any expiring immunizations (i.e., PPD tests, flu vaccine) or CPR certifications. If your CPR expires soon, schedule renewal now and make sure you take the correct course. The CPR card needs to read, "Healthcare Professional or Healthcare Provider" and is good for two years. Please note: If clinical requirements are not updated by January 2nd, students may be unenrolled from clinical courses, which could affect financial aid eligibility. You will also lose professional points in your courses if this is not completed on time.

ATI DOSAGE EXAM: Students will be given an ATI proctored dosage exam (ATI Dosage Calculation RN Medical Surgical Proctored Assessment 2.0) in Week 1-2 of the semester. This is to prepare you for safe medication administration in clinical. It is advised that students complete the ATI drug dosage tutorial (within the last month), and achieve a 90% or greater. Students cannot administer medication in clinical unless they pass this ATI Dosage Calculation RN Medical Surgical Proctored Assessment with ≥90%. If students score below a 90%, they will be expected to repeat the dosage exam until a 90% is achieved. An ATI dosage re-take is usually scheduled 1-2 weeks after the original dosage exam by your clinical instructor. Here is additional information on the Dosage Calculation RN Adult Medical Surgical Assessment 2.0– This 25-item assessment that addresses drug calculations and conversions used when caring for clients with medical-surgical disorders. Items may reflect a client focus that is based on caring for clients with respiratory, cardiovascular, hematologic, fluid and electrolyte, renal and urinary, endocrine,
gastrointestinal, neurosensory, musculoskeletal, lymph, immune, infectious, and integumentary systems. Additionally you will also be tested on IV drops per minute.
