We’re Hiring!
Student Computing is looking for qualified students with a background in customer service/retail as well as those with a background in computer support, repair, and software development. Working for Student Computing and ResNet is the perfect job:
- On campus – all work is in the residence halls or in the Student Computing offices in the library
- Flexible hours – shifts available almost any time of day or night
- Looks great on a résumé – gain valuable technical, customer service, and communication skills
- Great pay – starts at $7.25 to $7.85 per hour (depending on skills and experience)

Positions Available:
- ResNet Technician – in-room tech support for users in all ResNet halls
- Lab Assistant – assisting users in computer labs and on the phone

Interested? Send a résumé or short summary of your qualifications to:
resnet@csuchico.edu

Questions? Visit www.csuchico.edu/resnet or email resnet@csuchico.edu
WHAT IS RESNET?

ResNet is Chico State’s high-speed computer network in the residence halls. Each room in the residence halls is equipped with one Ethernet jack per person.

Through ResNet, residents can access the Internet from the comfort of their own room. They can also access the campus Portal, WildcatMail, library resources (e.g. Lexis-Nexis), and other on-campus electronic resources.

Access to ResNet is included as part of your housing contract, so there are no added fees. You also have access to the Student Computing helpdesk for technical support and scheduling in-room appointments with ResNet technicians. The helpdesk can be reached at (530) 898-HELP.

Please take the time to read through this guide and familiarize yourself with the requirements of ResNet. Especially, make sure that you read and follow the steps in Before You Get To Chico on page 3.

Should you have any questions, please see our website at www.csuchico.edu/resnet or email resnet@csuchico.edu.

Broadband access at University Village is expected to become available sometime after residents move-in. Please check the ResNet website for details, or contact the Housing office at (530) 898-6325.

WIRELESS INTERNET ACCESS

Every resident gets free wireless access in the common areas of the residence halls as well as in selected locations across campus.

Please note that the wireless service in the residence halls is primarily available in common areas such as study lounges or computer labs. Although some rooms will be within range of the wireless signal, residents should expect to use the wired connection when connecting in their rooms.

Technical support for the campus wireless service is handled through the Student Computing helpdesk, which can be reached at (530) 898-HELP. You can also get wireless help at the 2006 ResNet Setup Fair (see page 4).

PERSONAL WIRELESS ACCESS POINTS

Personal Wireless Access Points (WAPs), like the ones available at electronics stores such as Best Buy or Fry’s, are not allowed in the on-campus residence halls. They are a security risk and can cause network problems when not properly configured. If a personal WAP is discovered in the residence halls, it may be blocked from accessing the network.
COMPUTER REQUIREMENTS

Below are the recommended configurations for student-owned computers and the list of currently supported operating systems. Computers that fall below the recommended configuration may still work with ResNet. However, support for them by the ResNet staff is not guaranteed.

<table>
<thead>
<tr>
<th>Recommended Computer Configurations</th>
</tr>
</thead>
<tbody>

<tr>
<td><strong>LINUX</strong></td>
</tr>
<tr>
<td>ResNet does not support any distributions of this operating system. However, we will provide information about our network to assist Linux users in configuring their computers to access our network.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Gaming Consoles</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>XBox, PlayStation</strong></td>
</tr>
</tbody>
</table>
If you have a gaming console (such as an XBox or PlayStation 2) that can connect to the Internet, you can use them on the ResNet network. In order to setup your console on the network, you will need to give your console’s **Hardware Address** (also referred to as a **MAC Address**) to the ResNet staff. You can do this by visiting the **2006 ResNet Setup Fair** (see page 4) or by emailing your Hardware Address to resnet@csuchico.edu when you move in.

BEFORE YOU GET TO CHICO

Chico State must keep its computer networks safe, clean and usable for everyone on campus, which means every computer needs to be protected from potential threats on the Internet. We also want to make sure you are able to get online and ready for classes as soon as possible. You can help us by following these simple steps – BEFORE you get to Chico.

1. Install all Critical/High-Priority updates and patches for your computer.
   - Windows users: [www.windowsupdate.com](http://www.windowsupdate.com)
   - Windows and Mac users who have Microsoft Office: [office.microsoft.com/officeupdate](http://office.microsoft.com/officeupdate)

2. Make sure your computer has Ethernet capability.
   All rooms are equipped with standard RJ-45 Ethernet jacks. To plug your computer into the jack, your computer will need the following:
   - An Ethernet Adapter (also called a Network Interface Card or NIC).
     There are different Ethernet adapters for laptops and desktops, so you should consult your owner’s manual to see if your computer has Ethernet capability. If you have a high-speed connection such as DSL or Cable Modem at home, your computer most likely has an Ethernet adapter in it.
   - A Cat-5 or better Ethernet cable.
     These can be purchased at any major computer or electronics store. Whitney Hall residents: We recommend that you purchase a 50-foot-long cable to ensure that it will reach the wall jack in any furniture configuration in any room. For other halls,

3. Windows XP Users: Service Pack 2
   Windows XP Service Pack 2 must be installed on your computer in order to access ResNet. To see if your computer has Service Pack 2 installed:
   - Inside the Control Panel, click “Performance and Maintenance”, then “System”. (Some users will not see the “Performance and Maintenance” icon.)
   - In the “General” tab, you will see this information:
     ![Service Pack 2 Information](image)
     - If the words “Service Pack 2” appear in this window, Service Pack 2 is installed on your computer.
     - If this window says “Service Pack 1” or something else, you should go to [www.windowsupdate.com](http://www.windowsupdate.com) and use Windows Update to install Service Pack 2 on your computer.
     - After installing Service Pack 2, you will need to go back to [www.windowsupdate.com](http://www.windowsupdate.com) to install additional critical updates.
     - If you do not have Service Pack 2 on your computer when you move in, you may be prevented from accessing ResNet.
WHEN YOU ARRIVE

When you check-in to your residence hall, you will be given a ResNet setup package containing instructions and other materials. Follow the instructions to setup your computer and register it on the network.

Anti-Virus Software

ResNet will be providing a free, one-year license of McAfee’s VirusScan software for all residents. If you have another anti-virus product, such as Norton Anti-Virus or TrendMicro PC-cillin, you will need to ensure that the software and definitions remain up-to-date or you will be unable to access the network. Instructions for downloading and installing VirusScan are available at the ResNet website and will be in the ResNet setup package you receive once you move-in.

If you are unable to get online after following the instructions, or you need help installing McAfee VirusScan, don’t worry! You can stop by the 2006 ResNet Setup Fair.

2006 ResNet Setup Fair Schedule

ResNet technicians will be available for in-room help from Wednesday, August 16 through Saturday, August 21. Use the chart below to determine where you should go for help.

<table>
<thead>
<tr>
<th>If you live in:</th>
<th>Go here for help:</th>
<th>On these days:</th>
<th>At these times:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lassen, Shasta, or Whitney</td>
<td>Shasta Rec Room</td>

<td>12 Noon – 6 PM</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Thursday, 8/17</td>
<td>10 AM – 8 PM</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Friday, 8/18</td>
<td>2 PM – 8 PM</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Saturday, 8/19</td>
<td>12 Noon – 6 PM</td>
</tr>
<tr>
<td>Esken, Konkow, or Mechoopda</td>
<td>Esken Study Lounge</td>
<td>Thursday, 8/17</td>
<td>10 AM – 8 PM</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Friday, 8/18</td>
<td>2 PM – 8 PM</td>
</tr>
</tbody>
</table>

(Times are subject to change. The official schedule will be posted in the halls when you move in.)

When you come to the Fair, a technician will be dispatched to your room as soon as one becomes available. Technicians will be able to help you connect your computer to the network, install updates or other required software, and to answer any questions you may have.

Getting Computer Help after the Setup Fair

After the fair is over, you can call the Student Computing helpdesk at (530) 898-HELP to setup an appointment with a ResNet technician. However, you should do your best to setup your computer as early as possible so that you can get help during the Setup Fair if you run into problems. The Student Computing helpdesk is very busy during the first two weeks of school, which means a four- to five-day wait for a technician to visit your room. The Setup Fair is your best bet to make sure you are up and running before classes start.
DOWNLOADING MUSIC & ILLEGAL FILE SHARING

Under the Digital Millennium Copyright Act of 1998, California State University, Chico is required to take steps to expeditiously remove or disable access to any copyrighted material being shared illegally from within its network.

What is illegal file sharing?

Using file sharing programs such as KaZaA, BitTorrent, iMesh, and LimeWire to share or obtain copyrighted music, movies, games, and other software without the permission of the copyright holder is illegal.

Organizations such as the Recording Industry Association of America (RIAA), the Motion Picture Association of America (MPAA), the Business Software Alliance (BSA), MediaForce, and others monitor file sharing systems on the Internet. When they discover an instance of illegal file sharing that is originating from within Chico State's network, they will send an official notice to the University. Upon receipt of this notice, the University must take action to stop copyright infringement from occurring on its network.

What are the consequences?

If the University receives notification that you are illegally sharing copyrighted files:

- Your ResNet network privileges will be suspended and you will be unable to access the Internet from your computer.
- You will be billed $25 to reconnect and will be required to attend a conduct meeting with your Residence Community Coordinator.

If this happens, you will be notified via an email to your WildcatMail account. It will be your responsibility to follow the instructions in the email to have your network privileges restored. Repeat offenders will lose their network privileges indefinitely and will be referred to Student Judicial Affairs.

In addition to any action taken by the university, the organization that owns the copyright can also file legal charges. Penalties for illegal file sharing and downloading include jail time and fines of up to $150,000 for each song, movie, or software product.

What can I do to prevent illegal file sharing?

Use subscription or pay services such as Apple iTunes or Napster. These services have entered into agreements with copyright holders that allow them to sell music legally.

Avoid file sharing programs. The University strongly discourages the use of file sharing programs (such as KaZaA, BitTorrent, iMesh, and LimeWire) because of the risk that the files being shared may be copyrighted. Additionally, many file sharing programs serve as distribution points for adware, spyware, Trojans, viruses, and other malicious programs.

If you are concerned that your computer may be sharing copyrighted files, please contact the Student Computing helpdesk at:

(530) 898-HELP
