Calls For Service Statistics at Fraternities & Sororities, City of Chico, CA

These statistics on total calls for service, call duration, and selected call types were compiled for all fraternities and sororities in the City of Chico for the last six calendar years. Data was retrieved based on the names of these houses rather than specific addresses. Call duration was calculated from the time an officer was dispatched by our Dispatch center until the time the same officer informed our Dispatch center that she or he was available to respond to the next call.
