Jon Clark - BCAG  
Executive Director, 879-2468

- Striping is anticipated the week of 8/25.
- Temporary striping is in place with signage at both ramp intersections.
- Roadway and intersection storage capacity will remain somewhat reduced until final striping can be put into place. Left turns from East First Avenue to southbound and northbound SR 99 are available, yet limited with temporary traffic signals.
- Signing will remain indicating the availability of Alternate Routes on Fifth and Palmetto Avenues.
- All pedestrian access is available.
- Northbound off ramp retaining wall construction will continue. Temporary railing will remain in place throughout this phase of work.
- **Work to install concrete islands will be under way on East First Avenue. These islands are intended to limit left turns onto and off of East First Avenue at Sarah and Sheridan Avenue. Please use CAUTION and expect intermittent lane shifts on East First Avenue while this work is underway.**
- **Concrete will be placed for new signals.**
- **Peak hour traffic is expected to experience continued delays with the addition of college student traffic.**

Please exercise caution in all construction areas and use alternate routes when possible.

Updates will be provided weekly.
