## Introduction

Using clickers with your course can provide valuable instant feedback. This tutorial demonstrates how to let your students register their clickers through Vista. This is a necessary step for their clickers to work properly with your class.

## Setting up Clicker registration in Vista

Select the **Build** tab in Vista for the first two sections of this tutorial.

### Section 1: Enable Clicker Registration

1. From **Designer Tools** select **Manage Course**.

2. Select **Settings**

3. Select **Clicker Registration** from the list.

4. Select True for Enable Tool.

5. Select **Save Values**.

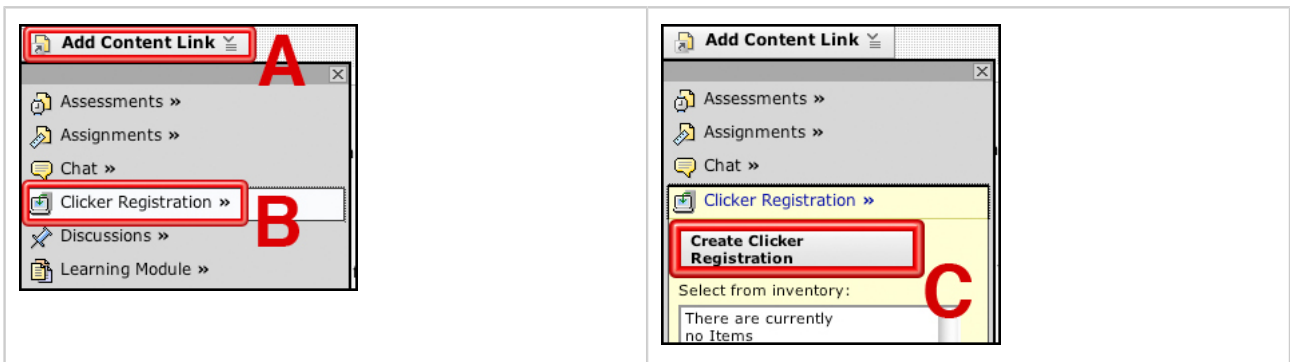

## Section 2: Add the Clicker Registration Icon

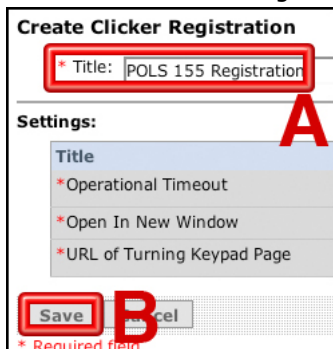

1. Select **Course Content** from the **Course Tools** menu on the left.

2. Select **Add Content Link (A)**, then **Clicker Registration (B)**, and then **Create Clicker Registration (C)**.

3. Enter a title for the Registration icon in the title box (A), then select **Save (B)**.

**Congratulations!** You've completed all the necessary steps to set Vista up to let your students register their clickers.

Follow the steps below for instructions on how your students can register their clickers.

## Section 3: Student Registration

In order for an instructor to test the clicker registration button, they need to be in the **Teach** tab. It will not work in the Build or Student View tab.

1. Select the **Clicker Registration** icon you created.

2. In the new page that opens, enter the Device ID for a clicker **(A)** then select **Submit (B)**.

Response Device ID:	251419
Confirm Response Device ID:	251419

Your currently registered Response Device ID is: 008BDF

**Response Device ID:** The six digit **Device ID** located on the back of each Clicker.

4. A message should appear that says: **Keypad Successfully added to WebCT.**

✔ Consider using incentives for the student to register their Clickers (Deadlines or extra credit points).

Be ready for excuses from students: *I forgot my clicker, or My clicker is not working, or it is not reporting the answers I gave.*

⚠ If students have not registered their Clickers, their names will not appear in the Participation List. Turning Point will receive an answer, but it will not have a student name associated with it. A student who does not register can not receive credit.
