Introduction
This tutorial will show you how to integrate the Wimba Voice Direct software into a Vista class using the PowerLink. With this voice tool you can conduct a synchronous virtual conference call, and archive that call. Virtual office hours can also be conducted using Voice Direct.

⚠️ Notice: Publish in the syllabus or in Vista when times for conferencing with students will be held. Also state that those conversations will be archived.

Getting Started

1. Sign into Vista then choose the **Build** tab.

⚠️ Notice: Have a USB headset to conduct calls. Without a headset feedback is unavoidable and difficult to keep conversations private.

Turning on Voice Direct

By default Voice Direct is not on in Vista. In order to access the Voice Direct Tool you must first turn it on.
Warning: If you already have the Voice Direct link on your vista page under Add Content Link, then please skip this section and go to “Adding Voice Direct.”

1. In the Designer Tools on the bottom left of the page, click on Manage Course.

2. Click on Settings.

3. Scroll down the Tools list and click on Voice Direct.

4. To enable this tool, click on the True bubble and click on Save Values.
Adding Voice Direct

1. After turning on Voice Direct, go back to your Vista homepage by clicking Course Content on the tool bar on the left of the page.

2. Once back on the homepage, click Add Content Link at the top center of the page.

3. Click on Voice Direct, and then click Create Voice Direct.
4. Add a title for your Voice Direct, and remember that it cannot have any punctuation. Give it a simple and short name, which will make your files appear more organized and easier to read. When you are finished click **Continue**.

![Title Input Field](image)

**Notice:** If you already have an existing Voice Direct you can add it at this time by selecting the title and clicking **Add Selected**.

---

**Settings**

1. The title is already filled out with the title you previously put in, but filling in a description can be very helpful. This is an optional step.

![Description Field](image)

2. Next you can adjust the audio settings. Keep the audio quality at **Standard Quality** unless you have a specific need for something else.

4. After you have finished with the settings, an icon to your Voice Direct will appear on your Vista homepage. In order to open and use it, you have to move to the Teach tab.

![Teach tab image]

5. Once in the Teach tab click on Launch Voice Direct. This is what the new Voice Direct will look like:
