presents a

Faculty Symposium

Beyond Smart Classrooms

Faculty Presenters:

Frederica Shockley, Eric Dietz, and Jan Costenbader

Where and When: Studio A, basement of
Meriam Library, from 12 noon to 2 p.m.

What will be covered?

- There is much more to a using smart classroom than just showing videos or PowerPoint presentations. During this session we will learn how the use of emerging technologies can enhance the learning experience in the technology-enabled classroom.
- Several faculty members are piloting the use of personal response systems (PSR), 'clickers,' to capture student responses in real time. Learn how these systems are utilized in the classroom and how they impact the learning experience. We'll discuss the plans to implement PRSs campus wide in fall 2007, after review by a faculty committee.
- In addition, we are also piloting an iTunes University program this fall. We'll quickly introduce Stanford and UC Berekley's implementations and discuss how it may be applied and used in the Smart Classroom.
