NEWS

Faculty Symposium

"The Next Wave of Online Teaching Tools"

Participants will learn what is new in software that can improve their teaching and development of instructional materials. We will demonstrate new software and discuss its implications in higher education.

Respondus and StudyMate

Efficiently create rich WebCT quiz content with Respondus. Develop interactive games and quizzes for WebCT with StudyMate.

From Horizon Wimba

EduVoice - Make voice-postings in WebCT discussion boards, e-mail messages, and content pages. Add asynchronous vocal collaboration. Embed content with voice.

Live Classroom - You and your students can speak and interact live over the Internet. Collaborate, remediate, share documents, display and review course content. For office hours, study groups or team collaboration.

The Technology and Learning Program has this new software in their faculty computer lab for you to try, MLIB 003. Call us, 898-6167.

Distributed Learning Technologies (DLT) supports WebCT and Horizon Wimba (formerly HorizonLive).
