

Meriam Library and the Technology and Learning Program

present a

Faculty Symposium, Mon., Nov. 15, 2004, 3-4pm, MLIB 226

“How to Link to Journal Articles from within WebCT”

Did you know that you can now use WebCT to link directly to:

- thousands of journal articles
- hundreds of electronic books
- any materials that you have placed in electronic reserves through the Meriam library?

If you didn't know, come and see how to do these things.

New technologies and standards allow faculty the opportunity to provide stable and reliable links to scholarly materials that can be used to enrich and supplement your courses.

Faculty members can even construct online course packs that offer the advantages of immediate 24/7 access and can save their students money. Often the process is as easy as copying and pasting links into a web page. However, be aware that some library databases have their own idiosyncratic linking requirements and that off-campus users have special needs.

If you are interested in learning more on how to construct and place links to scholarly materials in

your online course, **Marc Langston** and **James Tyler** will be giving a workshop on **Monday, November 15, 2004, from 3:00-4:00pm in room 226 of Meriam Library.**

Langston and Tyler will provide an overview and **demonstration of linking technologies**, and give faculty a chance for **hands-on** practice.

Future faculty symposiums include a look at current copyright issues and the Teach Act. For more information, contact James Tyler, jtyler@csuchico.edu.

**TILT symposiums are sponsored by Information Resources,
Academic Technologies and the Technology & Learning Program.**
