Preparatory Questions for Exam III
Metacognition

1. Dinsmore is a relatively recent graduate of the University of Maryland who won a prestigious award for his article. Summarize what you learned about the concept of metacognition and SRL from his review.

2. Veenman organizes his article into a number of sections. Explain what he has to say about:
   a. How metacognition is defined.
   b. The components of metacognition.
   c. The relation between metacognition and cognition.
   d. The conscious or automated processes of metacognition.
   e. The domain generality or specificity of metacognition.
   f. The developmental processes of metacognition.

3. Schwartz proposes a new model of metacognition based on recent findings of neuroscience. Explain the way Schwartz believes metacognition works in learning and thinking.
