Mathematics and Writing Requirements

FOUR STEPS TO GRADUATION . . .

To assure that your mathematics and writing skills are adequate for success in college and in the career you eventually pursue, the following is required of all undergraduates. If you have questions, please inquire in the Advising Office, MLIB 190, or the Testing and Research Office, MLIB 143.

STEP 1. Take the ELM and the EPT

Unless you are exempt, you are required to take the Entry Level Mathematics (ELM) test and the English Placement Test (EPT) before your first semester at CSU, Chico.

IMPORTANT: If you do not take the tests before your first semester, you will not be allowed to take any courses at the university. If you think you are exempt, please check The Guide to Mathematics and Writing Requirements, which follows this section, or consult the Advising Office.

If you do not pass the ELM, you are required to enroll in remedial math coursework during your first semester. If you do not pass the EPT, you are required to enroll in remedial English course work either your first or second semester. You must successfully complete all remedial course requirements by the end of your second semester in order to be eligible to enroll at CSU, Chico in subsequent semesters.

STEP 2. Enroll in a Math course

IMPORTANT: Your ELM score will determine the math course for which you are eligible.

If you scored 50 or above on the ELM, you passed the ELM and can enroll in a General Education math course. When you pass GE math with a C- or better, you will have met the math requirement for graduation.

If you scored below 50 on the ELM, you must enroll in a remedial math course during your first semester at CSU, Chico. The course in which you are placed will be determined by your ELM score. You must complete all required remedial math course work through Intermediate Algebra by the end of your second semester.

Important Things To Know About . . .

MATH 011: Intensive Beginning Algebra
MATH 012: Intermediate Beginning Algebra
MATH 031: Beginning Algebra
MATH 032: Accelerated Intermediate Algebra
MATH 051: Intermediate Algebra

These non-baccalaureate courses are not figured into your GPA or units completed. They do, however, count for financial aid credit.

STEP 3. Enroll in English 130

Unless you are exempt, you are required to take

ENGL 130: Freshman Composition

ENGL 130: Freshman Composition fulfills a General Education requirement and is graded A-F. It may be repeated as often as needed to pass. A grade of C- or better is required. All students take this course unless exempt. See The Guide to Mathematics and Writing Requirements that follows for a complete list of exemptions.

ENGL 030: Writing Workshop is required concurrently with ENGL 130 for students who score 147 and below on the EPT (English Placement Test). It is graded Credit/No Credit and may be repeated as often as needed. It is non-baccalaureate and is therefore not figured in your GPA or units completed. It does, however, count for financial aid credit.

STEP 4. Take and pass the Writing Proficiency (WP) course in your major

You are required to take and pass the WP course in your major with a grade of C- or better in order to graduate, so it is important to talk with your advisor every semester and plan your schedule carefully.

You will not be allowed to enroll in the WP course until you have passed ENGL 130, Freshman Composition (or its equivalent on another campus), with a grade of C- or better. Faculty teaching WP courses will not allow you to sit in, audit, or enroll later in the semester.

If you are not sure what the WP course in your major is or when it is offered, see your advisor immediately. Some departments change their WP course from time to time, and your WP requirement is determined by the semester in which you take the course, not by catalog rights.

How To Meet The Math Requirement

All Students Must Take the ELM (unless exempt) before enrolling at CSU, Chico
