**Our Mission**

The Center for Regional and Continuing Education strengthens and expands the resources of the University to respond to lifelong learning needs.

*Serving the campus*
Recognizing the varied needs of the on-campus student, the center administers credit and non-credit courses beyond the regular University class schedule. To increase access, the center administers accelerated academic sessions during the winter and summer.

*Serving Northern California*
As the anchor institution in Northern California, California State University, Chico serves a twelve-county service area, the largest in the CSU system. The center is dedicated to providing higher education access to this distributed population through regional programs, Open University, and the delivery of accredited degrees via distance education.

*California and Beyond*
California State University, Chico is internationally recognized for a wide variety of academic achievements and programs. Sharing and maintaining this public trust with the world is a primary mission of the center.

Regional and Continuing Education

The service area of CSU, Chico covers 32,200 square miles—approximately 21 percent of the state of California—with a resident population of about 797,000, which is approximately 2 percent of the state’s total population. To accommodate the variety of demands and interests expressed by the people living in the rural areas of Northern California, the Center for Regional and Continuing Education has developed numerous programs and services.

Special Session

Special Session courses are approved course offerings available on a selected basis throughout the year. They carry residence credit with no limit on the number of units that can be applied to a degree program. Fees are charged on a per-unit basis and are separate from regular University semester fees.

Frequently, organizations and groups of individuals express a desire for special courses, seminars, or workshops to fill their own specific needs. Whether the need is for a course carrying credit or no credit, Continuing Education staff will meet with representatives of groups or agencies to plan the program.

Special Session courses are open to the general public and there is no formal admission requirement. Enrollment in Special Session or Extension does not constitute formal admission to the University.

Fees for courses providing academic credit are listed in the Fees and Expenses section of the University Catalog, the Continuing Education Web site (http://rce.csuchico.edu/), and the Continuing Education Bulletin.

Regional Programs

Regional programs support the University mission by extending educational programming and services throughout Northern California. The Extension program offers a wide variety of non-credit workshops encompassing personal enrichment and professional development topics, classroom-based and online computer training, financial planning, and test preparation.

In addition, Extension develops contract education and training solutions for small businesses, corporations, and government agencies.

Regional programming includes courses and conferences designed specifically for professional development and re licensure for teachers, registered nurses, physicians, dental hygienists, psychologists, marriage and family therapists, social workers, counselors, law enforcement personnel, and lawyers.

Since 1975, CSU, Chico has served the region with distance learning opportunities that have made Chico a nationally recognized leader in distance education. Continuing Education delivers a variety of degree completion programs to individuals throughout the state and beyond.

CSU, Chico also offers degree completion programs and the Professional MBA program at Shasta College and the Shasta College Downtown Center. Students can complete degrees without traveling to Chico, or take courses and transfer to the main campus.

Regional programs also serve the needs of federal, state, county, and non-profit community agencies. Initially established in the 1970’s, CSU, Chico’s Leadership Institute provides professional education to public service managers in areas such as leadership, strategic planning, and ethics. In 1999 CSU, Chico established programming to provide professional development opportunities for those who work with Family Court Services.

Conference Services

Continuing Education offers complete conference planning and event management services. Every year, these conferences attract thousands of participants to the beautiful Chico campus, many for the first time. These meetings enrich the entire University community, and provide a forum for professional groups and academic associations to advance their fields and share learning opportunities. Conference services include program design, marketing, online registration, financial management, media support, evaluation, and special event coordination.

Open University

Open University provides an opportunity for residents of CSU, Chico’s service area to have access to regularly-scheduled University classes on a limited basis, without formal admission to the University. Students select the classes they wish to attend through Open University from the current schedule of courses and attend the first meeting of the desired course to request permission of the instructor to enroll. Permission is contingent upon whether or not there is a vacancy, as well as other criteria established by the instructor, the department, or the college. Detailed instructions and Open University forms are available through Continuing Education.

Enrolling in courses offered by the College of Engineering, Computer Science and Technology requires the appropriate department chair’s signature. Some colleges may require additional signatures.

Open University fees are $175 per unit. Any debts to the University or registration holds must be resolved before registration can take place. Students participating in classes as a regularly-enrolled student may not take classes as an Open University student. Open University students who decide to apply for admission to the University must meet all the regular admission requirements.

The maximum number of Open University units that may be applied towards an undergraduate (B.A. or B.S.) degree is 24 units. All undergraduates, as well as graduate students pursuing a master’s degree, should refer to the department office of the appropriate major for the unit limit.

Open University for Disqualified Students and Students Who Have Been Denied Admission

Students disqualified and/or denied admission at CSU, Chico may be eligible to take regular University courses on a space-available basis through Open University (some restrictions apply). To participate in Open University, students will need to complete the petition part of the Add/Drop form. This form is available with the Open University registration forms and must be completed with proper signatures.

Complete Open University policies and procedures are available from Continuing Education or on the Web at http://rce.csuchico.edu/.

Chico Distance & Online Education

Chico Distance & Online Education offers a variety of courses and degree completion programs via the Internet using several Web-based applications.

Programs available include bachelor’s degrees in liberal studies, social science, nursing (for registered nurses); minors in sociology; the concentration in career planning and development; and a master’s degree in nursing.

Special Session degree programs are also available through Chico Distance & Online Education including a M.S. and B.S. in Computer Science. For a comprehensive list of distance education and online courses and degree programs, visit the Chico Distance & Online Education Web site at http://www.csuchico.edu/online.

Students may combine Chico Distance & Online Education, Special Session, summer term, and on-campus attendance to meet the degree requirements of these programs. Advising is mandatory in all distance education degree programs.

Distance Education Technologies

In 1975 CSU, Chico transmitted its first computer science programming via a microwave link to UC Davis. From this initial project, Chico quickly expanded its video transmission capabilities to include a microwave transmission system that encompassed the community colleges and various sites throughout Northern California.

With new innovations in satellite technologies the University installed a university system—Atlanta “earth station” on the campus in 1983 and a Ku-band station in 1987. For more than 20 years, CSU, Chico has maintained this satellite technology for receiving and transmitting educational programs throughout the world.

In 1997, CSU, Chico demonstrated the use of videostreaming technology as a means of transmitting video images over the Internet. Today, CSU, Chico offers more than 150 online courses each year via Internet-based technologies.

In addition to educational programming, CSU, Chico maintains a state-of-the-art two-way video facility and can access meeting rooms around the globe.

ALCI

The American Language and Culture Institute (ALCI) provides intensive English language instruction and introduces the American culture and the system of higher education to international students. Many students who attend ALCI have applied for University admission and have met all other entrance requirements, with the exception of language proficiency.

Non-University bound international students and adults seeking to improve their English language and US American culture skills for personal and professional development also attend ALCI.

In addition to intensive English language coursework, students participate in various recreational and educational activities designed to facilitate a smooth transition to the University environment and enhance an understanding of American society. Instruction is offered year-round: four seven-week sessions during the academic year and two five-week summer sessions.

Osher Lifelong Learning Institute

Established on the Chico campus in 2004, through the generous support from the Bernard Osher Foundation, the Osher Lifelong Learning Institute is a peer-led, learning in retirement organization that offers a wide variety of non-credit classes and activities for adults, age 60 or retired.
