Program

BS in Environmental Science
Options in:
- Applied Ecology
- Atmospheric Science
- Environmental Chemistry
- Earth Resource Science
- Hydrologic Science

BS in Geology
Certificate in Hydrogeology
BS in Geosciences
Options in:
- Physical Science Education
- Science Education (Geosciences)

Minor in Geology
Single Subject Teaching
Certificate in Science
MS in Environmental Science
- MS Option in Professional Science

MS in Geosciences
- MS Option in Hydrology/Hydrogeology

Disciplines within the geological and environmental sciences are directed toward understanding the terrestrial system from the core of the Earth to beyond our solar system. Students will conduct applied and basic research in an effort to understand physical processes on and within the Earth, and human influences that affect the environment.

Environmental science is the study of interactions within the Earth’s biosphere, concentrating on natural and man-made perturbations such as pollution. The BS in Environmental Science prepares students for careers in areas such as pollution remediation, resource conservation, or environmental management, as well as providing a firm foundation for graduate studies.

Geology is the study of processes occurring in or on the Earth. The B.S. in Geology prepares students for careers or graduate education in fields such as resource exploration, hydrogeology, or environmental geology.

The Geosciences degree is designed for students who plan to become science teachers. It provides students with the required subject matter competency to enter a single-subject credential program in science with a concentration in Geoscience and/or one of the other physical sciences.

The MS in Geosciences or Environmental Science provides a framework for advanced study and research. A thesis is required, and students in the program may pursue any topic approved by a thesis committee. Some support for graduate students is available in the form of teaching or research assistantships.

The Professional Science Option under the MS in Environmental Science provides students with advanced training in the environmental sciences, along with professional courses aimed at preparing students for management and non-academic positions. Instead of a thesis, a required internship is an integral component of the program.

Faculty and Facilities
In keeping with the interdisciplinary nature of the department, the faculty represent diverse academic areas, complemented by industrial experience. All have a strong commitment to excellence in teaching and engage in professional development.

Department equipment and facilities are extensive and include equipment for field and laboratory work in environmental science, geology, and hydrology/hydrogeology.

Academic Activities
Lecture courses are accompanied by laboratories and field trips. Internships and work experience are also available.

The Association of Geological and Environmental Students (AGES) is open to all students. AGES hosts several off-campus field trips each semester. Many majors are also members of national organizations such as the American Geophysical Union, American Meteorological Society, and the Geological Society of America.

Career Outlook
Employment opportunities are excellent. Our graduates work for agencies such as the California Department of Water Resources, the United States Geological Survey, and the Environmental Protection Agency. Graduates are also employed by private companies specializing in mineral and petroleum exploration, engineering or environmental consulting, and pollution remediation.

Graduates with a bachelor’s degree find entry-level positions which involve gathering and interpreting scientific data. Management and field-oriented research positions generally require a master’s degree. Students interested in basic research or a position at a community college or university are advised to plan on working toward a graduate degree. The career outlook for science teachers is excellent. Geosciences majors may enter the single subject credential teaching program upon completion of their degree.
The Bachelor of Science in Geosciences

Total Course Requirements for the Bachelor's Degree: 120 units
See “Requirements for the Bachelor’s Degree” in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

A suggested Major Academic Plan (MAP) has been prepared to help students meet all graduation requirements within four years. Please request a plan from your major advisor or view it and other current advising information at http://em.csuchico.edu/aap/ProgramSearch.

General Education Requirements: 48 units
See “General Education Requirements” in the University Catalog and the Class Schedule for the most current information on General Education Requirements and course offerings. The course requirements marked below with an asterisk (*) may also be applied toward General Education.

Geosciences majors in the Option in Science Education with a Concentration in Geosciences may meet the Breadth Area B2 requirement by completing BIOL 151.

Diversity Course Requirements: 6 units
See “Diversity Requirement” in the University Catalog. Most courses taken to satisfy these requirements may also apply to General Education.

U.S. History, Constitution, and American Ideals: 6 units
See “U.S. History, Constitution, and American Ideals” under “Bachelor’s Degree Requirements”. This requirement is normally fulfilled by completing HIST 130 and POLS 155 or approved equivalents. Courses used to satisfy this requirement do not apply to General Education.

Literacy Requirement:
See “Mathematics and Writing Requirements” in the University Catalog. Writing proficiency in the major is a graduation requirement and may be demonstrated through satisfactory completion of a course in your major which has been designated as the Writing Proficiency (WP) course for the semester in which you take the course. Students who earn below a C- are required to repeat the course and earn a C- or better to receive WP credit. See the Class Schedule for the designated WP courses for each semester. You must pass ENGL 130 (or its equivalent) with a C- or better before you may register for a WP course.

Course Requirements for the Major: 64-66 units
Completion of the following courses, or their approved transfer equivalents, are required of all candidates for this degree. Additional required courses, depending upon the selected option or advising pattern, are outlined following the major core program requirements.

Major Core Program: 45-46 units

Lower-Division Requirements: 32-33 units
5 courses required:

CHEM 111 General Chemistry 4.0 FS *
Prerequisites: Second-year high school algebra, one year high school chemistry. (One year of high school physics and one year of high school mathematics past Algebra II are recommended.)

CHEM 112 General Chemistry 4.0 FS
Prerequisites: CHEM 111 with a grade of C- or higher.

GEOS 102 Physical Geology 3.0 FS *
Prerequisites: High school chemistry or physics is recommended; students with no previous science courses are advised to enroll in GEOS 101. No college credit for those who have passed GEOS 101.

GEOS 105 Introduction to Astronomy 3.0 FS *

GEOS 203 Principles of Historical Geol 3.0 FA
Prerequisites: GEOS 101 or GEOS 102.

2 courses selected from:

PHYS 202A General Physics 4.0 FS *
Prerequisites: High school physics or faculty permission. High school trigonometry and second-year high school algebra or equivalent (MATH 031 and MATH 118 at CSU, Chico).

AND (Both the above and following course must be taken)

PHYS 202B General Physics 4.0 FS
Prerequisites: PHYS 202A.

Or two of the following courses may be substituted for PHYS 202A and PHYS 202B:

PHYS 204A Mechanics 4.0 FS *
Prerequisites: High school physics or faculty permission. Concurrent enrollment in or prior completion of MATH 121 (second semester of calculus) or equivalent.

PHYS 204B Electricity and Magnetism 4.0 FS
Prerequisites: PHYS 101, PHYS 204A with a grade of C- or higher.

PHYS 204C Heat/Wave Motion/Sound/Light 4.0 FS
Prerequisites: MATH 121, PHYS 204A with a grade of C- or higher.

1 course selected from:

MATH 109 Survey of Calculus 4.0 FS *
Prerequisites: Completion of ELM requirement; MATH 118, MATH 119 (or High School equivalents).

MATH 120 Analytic Geometry and Calculus 4.0 FS *
Prerequisites: Completion of ELM requirement; both MATH 118 and MATH 119 (or high school equivalent); a score that meets department guidelines on a department administered calculus readiness exam.

1 course selected from:

MATH 105 Statistics 3.0 FS *
Prerequisites: Completion of ELM requirement.

MATH 121 Analytic Geometry and Calculus 4.0 FS
Prerequisites: MATH 120.

Upper-Division Requirements: 13 units
4 courses required:

GEOS 300 Earth System Science 3.0 FA WP
Prerequisites: ENGL 130 (or its equivalent) with a grade of C- or higher; CHEM 107 or CHEM 111; PHYS 202A, PHYS 202B or PHYS 204A, PHYS 204B or PHYS 204C.

GEOS 316 Mineralogy and Lithology 4.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 321 Introduction to Meteorology 3.0 FA
Prerequisites: MATH 120; either PHYS 202B or PHYS 204C.

GEOS 341 Teaching Practicum in GEOS 3.0 FS
Prerequisites: GEOS 102, GEOS 105, GEOS 203, GEOS 306, GEOS 321.

Major Option Course Requirements: 19-20 units
The following courses, or their approved transfer equivalents, are required dependent upon the option chosen. Students must select one of the following options for completion of the major course requirements.

The Option in Physical Science Education: 19-20 units
This option provides students with a good foundation in each of the physical sciences so that they are prepared to pass the California Subject Examinations for Teachers (CSET) in Earth Science. Students who complete the program are also prepared to pass the General Science CSET, which will allow them to teach general science at the middle school level.

Lower-Division Requirements: 7-8 units
1 course required:

CHEM 270 Organic Chemistry 4.0 FS
Prerequisites: CHEM 112.

1 course selected from:

BIOL 101 Concepts of Biology 3.0 FS

BIOL 151 Prin of Cell and Molec Biology 4.0 FS
Prerequisites: Recommend CHEM 111 or concurrent enrollment.

NSCI 102 Intro to Living Systems 3.0 FS *

Upper-Division Requirements: 12 units
4 courses required:

BIOL 302 Evolution 3.0 SP *
Prerequisites: BIOL 101 or BIOL 108 or equivalent.

CHEM 411 Chemistry Teaching Methods 3.0 SP
Prerequisites: CHEM 112, CHEM 270. CHEM 320 is recommended.

CHEM 440 Environmental Chemistry 3.0 SP
Prerequisites: CHEM 112.

PHYS 360 Sound in the Environment 3.0 FS *

The Option in Science Education with a Concentration in Geosciences: 20 units
This option is an approved Subject Matter Preparation Program for Science with a Concentration in Geoscience. Thus it fulfills one of the requirements for admission into a single subject teaching credential program. See the Single Subject Matter Preparation Program in Science section which follows for more information.

Lower-Division Requirements: 8 units
2 courses required:

BIOL 152 Prin Ecol, Evol, Org Biology 4.0 FS
Prerequisites: Recommend CHEM 111 or concurrent enrollment.

BIOL 151 Prin of Cell and Molec Biology 4.0 FS
Prerequisites: Recommend CHEM 111 or concurrent enrollment.

Upper-Division Requirements: 12 units
5 courses required:

CHEM 303 Invertebrate Paleontology 3.0 SP
Prerequisites: GEOS 203 or course in Biology.

GEOS 307 Stratigraphy 3.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 360 Field Methods 2.0 SP
Prerequisites: GEOS 306, GEOS 307.

GEOS 361 Preparing Geological Reports 1.0 SP WP
Prerequisites: ENGL 130 (or its equivalent) with a grade of C- or higher; GEOS 321.
GEOS 489T Internship Geoscience Teaching 3.0 FS
Prerequisites: GEOS 101 or GEOS 102, GEOS 105, GEOS 203
Corequisites: GEOS 300, GEOS 306, GEOS 307

Electives Requirement:
To complete the total units required for the bachelor's degree, select additional elective courses from the total University offerings. You should consult with an advisor regarding the selection of courses which will provide breadth to your University experience and possibly apply to a supportive second major or minor.

Grading Requirement:
All courses taken to fulfill major course requirements must be taken for a letter grade except those courses specified by the department as Credit/No Credit grading only.

Advising Requirement:
Advising is mandatory for all majors in this degree program. Consult your undergraduate advisor for specific information.

Honors in the Major
Honors in the Major is a program of independent work in your major. It requires 6 units of honors course work completed over two semesters. The Honors in the Major program allows you to work closely with a faculty mentor in your area of interest on an original performance or research project. This year-long collaboration allows you to work in your field at a professional level and culminates in a public presentation of your work. Students sometimes take their projects beyond the University for submission in professional journals, presentation at conferences, or academic competition. Such experience is valuable for graduate school and professional life. Your honors work will be recognized at your graduation, on your permanent transcript, and on your diploma. It is often accompanied by letters of commendation from your mentor in the department or the department chair.

Some common features of Honors in the Major program are:
1. You must take 6 units of Honors in the Major course work. All 6 units are honors classes (marked by a suffix of H), and at least 3 of these units are independent study (399H, 499H, 599H) as specified by your department. You must complete each class with a minimum grade of B.
2. You must have completed 9 units of upper-division course work or 21 overall units in your major before you can be admitted to Honors in the Major. Check the requirements for your major carefully, as there may be specific courses that must be included in these units.
3. Your cumulative GPA should be at least 3.5 or within the top 5% of majors in your department.
4. Your GPA in your major should be at least 3.5 or within the top 5% of majors in your department.
5. Most students apply for or are invited to participate in Honors in the Major during the second semester of their junior year. Then they complete the 6 units of course work over the two semesters of their senior year.
6. Your honors work culminates with a public presentation of your honors project.

While Honors in the Major is part of the Honors Program, each department administers its own program. Please contact your major department or major advisor to apply.

The Bachelor of Science in Geology

Total Course Requirements for the Bachelor's Degree: 120 units
See "Requirements for the Bachelor's Degree" in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

A suggested Major Academic Plan (MAP) has been prepared to help students meet all graduation requirements within four years. Please request a plan from your major advisor or view it and other current advising information at http://em.csuchico.edu/aap/ProgramSearch.

Please see General Education, Cultural Diversity, U.S. History, Constitution, and American Ideals, and Literacy Requirements under the BS in Geosciences.

Course Requirements for the Major: 65-66 units
Completion of the following courses, or their approved transfer equivalents, are required of all candidates for this degree.

Lower-Division Requirements: 21-22 units
4 courses required:
CHEM 111 General Chemistry 4.0 FS
Prerequisites: Second-year high school algebra; one year high school chemistry. (One year of high school physics and one year of high school mathematics past Algebra II are recommended.)

GEOS 102 Physical Geology 3.0 FS
Prerequisites: High school chemistry or physics is recommended; students with no previous science courses are advised to enroll in GEOS 101. No college credit for those who have passed GEOS 101.

GEOS 203 Principles of Historical Geol 3.0 FA
Prerequisites: GEOS 101 or GEOS 102.

MATH 120 Analytic Geometry and Calculus 4.0 FS
Prerequisites: Completion of ELM requirement; both MATH 118 and MATH 119 (or high school equivalent); a score that meets department guidelines on a department administered calculus readiness exam.

1 course selected from:
PHYS 202A General Physics 4.0 FS
Prerequisites: High school physics or faculty permission. High school trigonometry and second-year high school algebra or equivalent (MATH 051 and MATH 118 at CSU, Chico).

PHYS 204A Mechanics 4.0 FS
Prerequisites: High school physics or faculty permission. Concurrent enrollment in or prior completion of MATH 121 (second semester of calculus) or equivalent.

1 course selected from:
MATH 105 Statistics 3.0 FS
Prerequisites: Completion of ELM requirement.

MATH 121 Analytic Geometry and Calculus 4.0 FS
Prerequisites: MATH 120.

Students who are considering attending graduate school should talk with an advisor about additional preparatory courses in chemistry, mathematics, and physics. The department very strongly recommends CHEM 111, CHEM 112, MATH 120, MATH 121; either PHYS 202A and PHYS 202B or PHYS 204A, PHYS 204B, and PHYS 204C.

Upper-Division Requirements: 44 units
12 courses required:
GEOS 303 Invertebrate Paleontology 3.0 SP
Prerequisites: GEOS 203 or course in Biology.

GEOS 306 Mineralogy and Lithology 4.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 307 Stratigraphy 3.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 360 Field Methods 2.0 SP
Prerequisites: GEOS 306, GEOS 307.

GEOS 361 Preparing Geological Reports 1.0 SP WP
Prerequisites: ENGL 130 (or its equivalent) with a grade of C- or higher, GEOS 360.

GEOS 402 Optical Mineralogy 1.0 SP
Prerequisites: GEOS 360 with grade of C- or higher.

GEOS 403 Igneous/Metamorphic Petrology 4.0 SP
Prerequisites: GEOS 360 with grade of C- or higher. Must be taken concurrently with GEOS 403.

GEOS 404 Structural Geology 4.0 FA
Prerequisites: High school or college trigonometry; GEOS 203; GEOS 307 with grade of C- or higher.

GEOS 471 Field Geology 2.0 SP
Prerequisites: GEOS 360, GEOS 361, GEOS 408 (with grade of C- or higher in all courses).

GEOS 555 Sedimentary Basin Analysis 3.0 FA
Prerequisites: GEOS 307, GEOS 471.

GEOS 572 Advanced Field Geology 2.0 SP
Prerequisites: GEOS 403, GEOS 471.

GEOS 580 Geol Evolution of North Amer 3.0 SP
Prerequisites: GEOS 555, senior standing in Geology major, or faculty permission.

4 courses selected from:
GEOS 325 Geology of California 3.0 F2
Prerequisites: GEOS 101 or GEOS 102 or consent of instructor.

GEOS 390 Surficial Processes 3.0 F1
Prerequisites: MATH 120; either PHYS 202A or PHYS 204A.

GEOS 415 Hydrogeology 3.0 FA
Prerequisites: CHEM 111, GEOS 306, GEOS 380, MATH 120; PHYS 202A or PHYS 204A. Recommended: GEOS 307.

GEOS 436 Volcanology 3.0 S1
Prerequisites: GEOS 101 or GEOS 102, GEOS 306.

GEOS 450 Tectonics 3.0 S1
Prerequisites: GEOS 306, GEOS 307.

GEOS 545 Applied Geophysics 3.0 S2
Prerequisites: One year of physics, GEOS 102, or faculty permission.

GEOS 549 Economic Geology 3.0 S2
Prerequisites: GEOS 306, GEOS 307.

GEOS 550 Fossil Fuels 3.0 F1
Prerequisites: GEOS 203 and GEOS 306.

Geological and Environmental Sciences
Please see the Electives, Grading, and Advising Requirements under the BS in Geosciences.

## The Bachelor of Science in Environmental Science

### Total Course Requirements for the Bachelor's Degree: 120 units

See “Requirements for the Bachelor’s Degree” in the University Catalog for complete details on general degree requirements. A minimum of 40 units, including those required for the major, must be upper division.

A suggested Major Academic Plan (MAP) has been prepared to help students meet all graduation requirements within four years. Please request a plan from your major advisor. Please view it and other current advising information at http://em.csuchico.edu/aap/ProgramSearch.

### General Education Requirements: 48 units

See “General Education Requirements” in the University Catalog and the Class Schedule for the most current information on General Education Requirements and course offerings. The course requirements marked below with an asterisk (*) may also be applied toward General Education.

Environmental Science majors may meet the Breadth Area B2 requirement by completing BIOL 152.

Please see Cultural Diversity, U.S. History, Constitution, and American Ideals, and Literacy Requirements under the BS in Geosciences.

### Course Requirements for the Major: 69-75 units

Completion of the following courses, or their approved transfer equivalents, are required of all candidates for this degree.

#### Major Core Program: 43 units

**Lower-Division Requirements: 30 units**

8 courses required:

- **BIOL 152** Prin Ecol, Evol, Org Biology 4.0 SP
- **CHEM 111** General Chemistry 4.0 FS *
- **CHEM 112** General Chemistry 4.0 FS
- **GEOS 102** Physical Geology 3.0 FS *
- **GEOS 165** Environ I: Princpals & Practice 2.0 FA
- **GEOS 202A** General Physics 4.0 FS *
- **GEOS 265** Environ III: Atmos Water Soils 2.0 FA
- **PHYS 202A** Mechanics 4.0 FS *

2 courses selected from:

- **BIOL 152** Principles of Ecology 3.0 SP
- **CHEM 111** General Chemistry 4.0 FS
- **CHEM 112** General Chemistry 4.0 FS
- **GEOS 102** Physical Geology 3.0 FS *
- **GEOS 165** Environ I: Principles & Practice 2.0 FA
- **GEOS 202A** General Physics 4.0 FS *
- **GEOS 265** Environ III: Atmos Water Soils 2.0 FA
- **PHYS 202A** Mechanics 4.0 FS *

Or two of the following three courses may be substituted for PHYS 202A and PHYS 202B.

- **PHYS 204A** Mechanics 4.0 FS *
- **PHYS 204B** Electricity and Magnetism 4.0 FS
- **PHYS 204C** Heat/Wave Motion/Sound/Light 4.0 FS

Students who are considering attending graduate school should consult with an advisor before selecting lower-division core courses. We recommend PHYS 204A, PHYS 204B, and PHYS 204C.

**Upper-Division Requirements: 13 units**

5 courses required:

- **BIOL 350** Fundamentals of Ecology 3.0 SP
- **CHEM 112** General Chemistry 4.0 FS
- **CHEM 112** General Chemistry 4.0 FS
- **GEOS 102** Physical Geology 3.0 FS *
- **GEOS 165** Environ I: Principles & Practice 2.0 FA

**Prerequisites: BIOL 152 or faculty permission. Some taxonomic background is required.**

- **BIOL 404** Aquatic Ecology 4.0 FS *
- **CHEM 350** Environmental Chemistry 3.0 SP
- **CHEM 365** Applied Chemistry 3.0 SP
- **CHEM 380** Hydrology 3.0 SP
- **GEOS 300** Earth System Science 3.0 FA WP
- **GEOS 365** Environ IV: Env Sci Apps 2.0 SP
- **GEOS 400** Fund Env Sci Instrumentation 3.0 FA
- **GEOS 475** Senior Project 2.0 SP

- **MATH 109** Survey of Calculus 4.0 FS *
- **CHEM 107** Environ I: Principles & Practice 2.0 FA

**Prerequisites:** Completion of ELM requirement; both MATH 118 and MATH 119 (or High School equivalents).

- **MATH 120** Analytic Geometry and Calculus 4.0 FS *
- **GEOS 315** Pollution Chemistry 3.0 SP
- **GEOS 321** Introduction to Meteorology 3.0 FA
- **GEOS 325** Pollution Chemistry 3.0 SP
- **GEOS 327** Environmental Dendrochronology 3.0 SP
- **GEOS 334** Wetland/Riparian Res and Mgmt 3.0 SP

**Prerequisites:** Completion of lower-division core or faculty permission.

**The Option in Applied Ecology: 26 units**

**Lower-Division Requirements: 4 units**

1 course required:

- **MATH 109** Survey of Calculus 4.0 FS *
- **Prerequisites:** Completion of ELM requirement; both MATH 118 and MATH 119 (or High School equivalents).

**Upper-Division Requirements: 22 units**

6 courses required:

- **BIOL 404** Aquatic Ecology 4.0 FA
- **CHEM 350** Environmental Chemistry 3.0 SP
- **GEOS 300** Earth System Science 3.0 FA WP
- **GEOS 365** Environ IV: Env Sci Apps 2.0 SP
- **GEOS 475** Senior Project 2.0 SP

**Major Option Course Requirements: 26-32 units**

The following courses, or their approved transfer equivalents, are required upon the option chosen. Students must select one of the following options for completion of the major course requirements.

- **MATH 109** Survey of Calculus 4.0 FS *
- **Prerequisites:** Completion of ELM requirement; both MATH 118 and MATH 119 (or High School equivalents).

**The Option in Atmospheric Science: 29 units**

**Lower-Division Requirements: 8 units**

2 courses required:

- **MATH 120** Analytic Geometry and Calculus 4.0 FS *
- **CHEM 350** Environmental Chemistry 3.0 SP

**Upper-Division Requirements: 21 units**

7 courses required:

- **GEOS 315** Pollution Chemistry 3.0 SP
- **GEOS 321** Introduction to Meteorology 3.0 FA
- **GEOS 325** Pollution Chemistry 3.0 SP
- **GEOS 327** Environmental Dendrochronology 3.0 SP
- **GEOS 334** Wetland/Riparian Res and Mgmt 3.0 SP

**Prerequisites:** Completion of lower-division core or faculty permission.

**The Option in Earth Resource Science: 28 units**

**Lower-Division Requirements: 4 units**

1 course required:

- **MATH 109** Survey of Calculus 4.0 FS *
- **Prerequisites:** Completion of ELM requirement; both MATH 118 and MATH 119 (or High School equivalents).
Upper-Division Requirements: 24 units

7 courses required:

GEOS 306 Mineralogy and Lithology 4.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 307 Stratigraphy 3.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 360 Field Methods 2.0 SP

GEOS 410 Structural Geology 4.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 415 Hydrogeology 3.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 306 Hydrology 3.0 FA
Prerequisites: PHYS 202A or PHYS 204A (may be taken concurrently). 

GEOS 408 Structural Geology 4.0 FA
Prerequisites: High school or college trigonometry; GEOS 203; GEOS 307 with grade of C- or higher.

GEOS 415 Hydrogeology 3.0 S2
Prerequisites: GEOS 380, GEOS 306, GEOS 380, MATH 120; PHYS 202A or PHYS 204A. Recommended: GEOS 307.

GEOS 436 Volcanology 3.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 443 Water Resources Management 3.0 SP
Prerequisites: Upper-division standing; GEOS 330 or GEOS 380.

1 course selected from:

GEOS 516 Natural Water Systems 3.0 F2
Prerequisites: CHEM 111, GEOS 115.

GEOS 565 Geochemistry 3.0 FA
Prerequisites: GEOS 101 or GEOS 102. Recommended: GEOS 306.

1 course selected from:

GEOS 306 Mineralogy and Lithology 4.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 537 Ecosystem Ecology 3.0 SP
Prerequisites: BIOL 350, GEOS 270 or GEOS 380, or instructor consent.

GEOS 545 Applied Geophysics 3.0 S2
Prerequisites: One year of physics, GEOS 102, or faculty permission.

Advising Pattern Core Requirements: 6 units

The following courses, or their approved transfer equivalents, are required depending upon the advising pattern chosen. Students must select one of the following advising patterns for the completion of the major course requirements.

Watershed Advising Pattern: 6 units

2 courses required:

GEOS 390 Surficial Processes 3.0 F1
Prerequisites: GEOS 120, either PHYS 202A or PHYS 204A.

GEOS 410 Intro to Watershed Hydrology 3.0 SP
Prerequisites: GEOS 380 or prior hydrology course work and consent of instructor.

Watershed Advising Pattern: 6 units

2 courses required:

GEOS 307 Stratigraphy 3.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 530 Environmental Sys Modeling I 3.0 F2
Prerequisites: CHEM 112; GEOS 330 or faculty permission; MATH 120; either PHYS 202B or PHYS 204C.

Please see the Electives, Grading, and Advising Requirements under the BS in Geosciences.

The Minor in Geology

Course Requirements for the Minor: 22 units

The following courses, or their approved transfer equivalents, are required of all candidates for this minor.

Students majoring in Geology may not pursue a minor in Geology.

5 courses required:

GEOS 102 Physical Geology 3.0 FS *
Prerequisites: High school chemistry or physics is recommended; students with no previous science courses are advised to enroll in GEOS 101. No college credit for those who have passed GEOS 101.

GEOS 203 Principles of Historical Geol 3.0 FA
Prerequisites: GEOS 101 or GEOS 102.

GEOS 306 Mineralogy and Lithology 4.0 FA
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission.

GEOS 307 Stratigraphy 3.0 FA
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission.

GEOS 360 Field Methods 2.0 SP
Prerequisites: GEOS 306, GEOS 307.

7 courses selected from:

GEOS 303 Invertebrate Paleontology 3.0 SP
Prerequisites: GEOS 203 or course in Biology.

GEOS 361 Preparing Geological Reports 1.0 SP WP
Prerequisites: ENGL 130 (or its equivalent) with a grade of C- or higher, GEOG 360.

GEOS 402 Optical Mineralogy 1.0 SP
Prerequisites: GEOS 306 with grade of C- or better. Must be taken concurrently with GEOS 403.

GEOS 403 Igneous/Metamorphic Petrology 4.0 SP
Prerequisites: GEOS 306 with grade of C- or better. Must be taken concurrently with GEOS 402.

GEOS 408 Structural Geology 4.0 FA
Prerequisites: High school or college trigonometry; GEOS 203; GEOS 307 with grade of C- or higher.

GEOS 415 Hydrogeology 3.0 S2
Prerequisites: CHEM 111, GEOS 306, GEOS 380, MATH 120; PHYS 202A or PHYS 204A. Recommended: GEOS 307.

GEOS 436 Volcanology 3.0 S1
Prerequisites: GEOS 101 or GEOS 102, GEOS 306.

GEOS 471 Field Geology 2.0 SP
Prerequisites: GEOS 360, GEOS 361, GEOS 408 (with grade of C- or higher in all courses).

GEOS 549 Economic Geology 3.0 S2
Prerequisites: GEOS 306, GEOS 307.
**The Certificate in Hydrogeology**

This certificate provides Geology majors with the information and skills necessary to become certified hydrogeologists in the State of California. Before beginning the certificate, students must have completed the following courses with a minimum GPA of 2.5: CHEM 111, CHEM 112, GEOS 102, GEOS 306, PHYS 202A or PHYS 204A, PHYS 202B or PHYS 204C, MATH 120.

**Course Requirements for the Certificate:** 24 units

The following courses, or their approved transfer equivalents, are required of all candidates for this certificate:

- **Lower-Division Requirements:** 1 unit
  - 1 course required:
    - GEOS 250 Computer Apps in Geoscience 1.0 FS
      - Prerequisites: MATH 109 or MATH 120 (may be taken concurrently) or faculty permission.

- **Upper-Division Requirements:** 23 units
  - 8 courses required:
    - GEOS 380 Hydrology 3.0 FA
      - Prerequisites: PHYS 202A or PHYS 204A (may be taken concurrently).
    - GEOS 382 Hydro Field Methods I 1.0 FA
      - Prerequisites: GEOS 380 (may be taken concurrently) or faculty permission.
    - GEOS 383 Hydro Field Methods II 1.0 SP
      - Prerequisites: GEOS 380 (may be taken concurrently), GEOS 450 or faculty permission.
    - GEOS 390 Surficial Processes 3.0 F1
      - Prerequisites: MATH 120; either PHYS 202A or PHYS 204A.
    - GEOS 415 Hydrogeology 3.0 S2
      - Prerequisites: CHEM 111, GEOS 306, GEOS 380, MATH 120; PHYS 202A or PHYS 204A. Recommended: GEOS 107.
    - GEOS 460 Water Resources Management 3.0 SP
      - Prerequisites: Upper-division standing; GEOS 330 or GEOS 380.
    - GEOS 530 Environmental Sys Modeling I 3.0 F2
      - Prerequisites: CHEM 112; GEOS 310 or faculty permission; MATH 120; either PHYS 202B or PHYS 204C.
    - GEOS 545 Applied Geophysics 3.0 S2
      - Prerequisites: One year of physics, GEOS 102, or faculty permission.
    - 1 course selected from:
      - GEOS 516 Natural Water Systems 3.0 F2
        - Prerequisites: CHEM 111, GEOS 315.
      - GEOS 563 Geochemistry 3.0 FA
        - Prerequisites: CHEM 111, GEOS 102, Recommended: GEOS 306.

**The Master of Science in Geosciences**

Course Requirements for the Master's Degree: 30 units

Continuous enrollment is required. A maximum of 9 semester units of transfer and/or CSU/Chico Open University course work may be applied toward the degree.

- **Graduate Time Limit:**
  - All requirements for the degree must be completed within five years of the end of the semester of enrollment in the oldest course applied toward the degree. See “Graduate Education” in the University Catalog for complete details on general degree requirements.
  - The MS degree in Geosciences is available for advanced study in any aspect of Geosciences including Astronomy, Environmental Science, Geology, Hydrology, and Meteorology. Prospective students should discuss their interests and goals with the department graduate coordinator.

- **Prerequisites for Admission to Conditionally Classified Status:**
  - Satisfactory grade point average as specified in “Admission to Master's Degree Programs” in the University Catalog.
  - Approval by the department and the Office of Graduate Studies.
  - An acceptable baccalaureate in one of the natural sciences, engineering, or mathematics from an accredited institution, or an equivalent approved by the Office of Graduate Studies.
  - The prospective student must have sufficient background to undertake a graduate program in the Geosciences. (The Option in Hydrology/Hydrogeology requires a year of college chemistry, mathematics, and physics.)

- **Prerequisites for Admission to Classified Status:**
  - Completion of the Graduate Record Examination Aptitude Test with a minimum combined score of 1000 on the verbal and quantitative portions.
  - Formation of a graduate advisory committee.
  - Development of an approved program in consultation with the graduate advisory committee.

**Advancement to Candidacy:**

In addition to any requirements listed above:

1. Completion of the Graduate Record Examination Aptitude Test with a minimum combined score of 1000 on the verbal and quantitative portions.
2. Formation of a graduate advisory committee.
3. Development of an approved program in consultation with the graduate advisory committee.

**Requirements for the MS in Geosciences:**

Completion of all requirements as established by the graduate advisory committee, and the Office of Graduate Studies, to include:

1. Completion of an approved program consisting of 30 units of 400/500/600-level courses as follows:
   - (a) At least 18 units in geosciences, which must include GEOS 601, GEOS 601, GEOS 640, and GEOS 699T. The Option in Hydrology/Hydrogeology also requires GEOS 621 and GEOS 660.
   - (b) Graduate courses from geosciences or other areas (e.g., mathematics, engineering, chemistry, or biological sciences) may be selected to constitute the remaining 12 units, with the approval of the graduate advisory committee. Substitutions for required courses must be taken at Chico and must be approved by the Graduate Coordinator.
   - (c) At least 18 of the units required for the degree in 600-level courses.
   - (d) Not more than 9 semester units of transfer and/or extension credit (correspondence courses and U.C. extension course work are not acceptable).
   - (e) Not more than 15 units taken before admission to classified status.
   - (f) At least 9 units completed after advancement to candidacy.
   - (g) Not more than 10 units of Independent Study (697) and Master's Thesis (699T); not more than 6 units of Master's Thesis (699T).
2. Completion and final approval of a thesis as specified by the student's graduate advisory committee.
3. Satisfactory completion of a comprehensive final examination (written and/or oral) in the field of study.
4. Approval by the departmental graduate committee and the Graduate Coordinators Committee on behalf of the faculty of the University.
Graduate Time Limit:
Toward the degree.
Transfer and/or CSU Chico Open University coursework may be applied.
Continuous enrollment is required. A maximum of 9 semester units of coursework taken at CSU subsequent to admission to the program; all course work are not acceptable.

Course Requirements for the Master's Degree: 30-36 units
The Master of Science in Geosciences Seminar I 1.0 FA
Geosciences Seminar II 1.0 SP
Advanced Topics in Geology 3.0 FS
Geotectonic Development of CA 3.0 FA
Hydrogeochemistry 3.0 SP
Prerequisites: Graduate standing or consent of instructor.
Prerequisites: CHEM 111, CHEM 112. Recommended: GEOS 565.

2-3 units selected from:
Environmental Monitoring 2.0 FA
Prerequisites: CHEM 425 is recommended.
Numerical Analysis 3.0 SP
Prerequisites: MATH 120.

1-6 units selected from:
Master's Thesis 1.0-6.0 FS
Prerequisites: Instructor permission.

At least 1 unit of Master's Thesis is required.
10-16 units selected from:
Select 10-16 units of courses approved by the graduate committee.

The Option in Hydrology/Hydrogeology
11 units required:
Geosciences Seminar I 1.0 FA
Geosciences Seminar II 1.0 SP
Advanced Topics in Hydrology 3.0 FS
Hydrogeochemistry 3.0 SP
Numerical Analysis 3.0 SP
Prerequisites: MATH 120.
Prerequisites: CHEM 425 is recommended.

2-3 units selected from:
Geotectonic Development of CA 3.0 FA
Environmental Monitoring 2.0 FA
Prerequisites: CHEM 425 is recommended.

1-6 units selected from:
Master's Thesis 1.0-6.0 FS
Prerequisites: Instructor permission.

At least 1 unit of Master's Thesis is required.
10-16 units selected from:
Select from courses approved by the graduate committee.

Graduate Requirement in Writing Proficiency:
Writing proficiency is a graduation requirement.

Geosciences students will normally demonstrate their writing competence through successful completion of GEO 600 and GEO 601, Geosciences Seminar, or approved substitute.

Graduate Grading Requirements:
All courses in the major (with the exceptions of Independent Study - 697, Comprehensive Examination - 696, Master's Project - 699, and Master's Thesis - 699T) must be taken for a letter grade, except those courses specified by the department as ABC/No Credit (400/500-level courses), AB/No Credit (600-level courses), or Credit/No Credit grading only. A maximum of 10 units combined of ABC/No Credit, AB/No Credit, and Credit/No Credit grades may be used on the approved program (including 697, 696, 699P, and 699T). All course work taken at CSU, Chico subsequent to admission to the master's program; all course work taken at CSU, Chico subsequent to admission to the program; and all courses on the approved master's degree program.

Graduate Advising Requirement:
Advising is mandatory for new and readmitted students in the master's program in Geosciences. Consult the Graduate Coordinator for specifics.

The Master of Science in Environmental Science
Course Requirements for the Master's Degree: 30-36 units
Continuous enrollment is required. A maximum of 9 semester units of transfer and/or CSU Chico Open University course work may be applied toward the degree.
Graduate Time Limit:
All requirements for the degree are to be completed within five years of the end of the semester of enrollment in the oldest course applied toward the degree. See “Graduate Education” in the University Catalog for complete details on general degree requirements.
The MS degree in Environmental Science is available for advanced study in biological, chemical, or geoscience aspects of environmental science, as well as environmental policy and planning. Prospective students should discuss their interests and goals with the Department of Geological and Environmental Studies Graduate Coordinator.
The PSM option of the MS degree in Environmental Science is available for advanced study in biological, chemical, or geoscience aspects of environmental science. Prospective students should discuss their interests and goals with the Professional Science Master's Graduate Coordinator.

Prerequisites for Admission to Conditionally Classified Status:
1. Completion of the Graduate Record Examination Aptitude Test with a minimum combined score of 1000 on the verbal and quantitative portions.
2. Formation of a graduate advisory committee.
3. Development of an approved program in consultation with the graduate advisory committee.

Advancement to Candidacy:
In addition to any requirements listed above:
Students must have classified graduate standing and must have completed at least 9 units of the proposed program at the University.

Requirements for the MS in Environmental Science: 30 units
Completion of all requirements as established by the graduate advisory committee, and the Office of Graduate Studies, to include:
1. Completion of an approved program consisting of 30 units of 400/500/600-level courses as follows:
(a) A core of 12-15 units in required courses to include GEO 600, GEO 601, GEO 640, GEO 660, a 400/500/600-level course in biological science or chemistry and GEO 630 or GEO 650. Substitutions for required courses must be taken at Chico and must be approved by the Graduate Coordinator.
(b) 9-17 units of coursework selected from areas such as mathematics, plant science, chemistry, geosciences, geography, political science, engineering, or biological sciences. Selection must be approved by the graduate advisory committee.
(c) 1-6 units of BIOL 699T or CHEM 699T or GEO 699T. At least one unit of Master's Thesis (699) is required.
(d) At least 18 of the units required for the degree in 600-level courses.
(e) Not more than 9 semester units of transfer and/or extension or Open University credit (correspondence courses and U.C. extension course work are not acceptable).
(f) Not more than 15 units taken before admission to classified status.
(g) At least 9 units completed after advancement to candidacy.
(h) Not more than 10 units of Independent Study (697) and Master's Thesis (699T; at least 1, but not more than 6, units of Master's Thesis (699T); 2. Completion and final approval of a thesis as specified by the student's graduate advisory committee.
3. Satisfactory completion of a comprehensive final examination (written and/or oral) in the field of study.
4. Approval by the Departmental Graduate Committee and the Graduate Coordinators Committee on behalf of the faculty of the University.

**Course Requirements for the MS in Environmental Science:**

- **8 units required:**
  - GEOS 600 Geosciences Seminar I 1.0 FA
  - GEOS 601 Geosciences Seminar II 1.0 SP
  - GEOS 640 Hydrogeochemistry 3.0 SP
  - Prerequisites: CHEM 111, CHEM 112. Recommended: GEOS 565.
  - GEOS 660 Numerical Analysis 3.0 SP
  - Prerequisites: MATH 120.

- **2-4 units selected from:**
  One 400/500/600-level course in Biological Sciences or Chemistry.

- **2-3 units selected from:**
  - GEOS 630 Geotectonic Development of CA 3.0 FA
  - Prerequisites: Graduate standing or consent of instructor.
  - GEOS 650 Environmental Monitoring 2.0 FA
  - Prerequisites: CHEM 425 is recommended.

- **1-6 units selected from:**
  - BIOL 699T Master's Thesis 1.0-6.0 FS
  - CHEM 699T Master's Thesis 1.0-6.0 FS
  - GEOS 699T Master's Thesis 1.0-6.0 FS
  - Prerequisites: Instructor permission.
  - At least 1 unit of 699T is required.

**Select 9-17 units from courses approved by the graduate committee.**

**Requirements for the MS in Environmental Science:**

**Professional Science Master's Option: 36 units**

Note: At the time of catalog publication, this proposed degree program is under review at the California State University Chancellor's Office.

Please contact the Geological and Environmental Sciences Department Office at (530) 898-5262, PHSC 217, for the current status.

Completion of all requirements as established by the graduate advisory committee and the Office of Graduate Studies to include the following.

1. Completion of an approved program consisting of 36 units of 400/500/600-level course work as follows:

   a. The following core of 24 units. Substitutions for required courses must be approved by the Program Director.

   - **7 courses required:**
     - GEOS 600 Geosciences Seminar I 1.0 FA
     - GEOS 601 Geosciences Seminar II 1.0 SP
     - GEOS 650 Environmental Monitoring 2.0 FA
     - Prerequisites: CHEM 425 is recommended.
     - GEOS 654 Environ Risk Assessment 3.0 FA
     - Prerequisites: GEOS 315, PHYS 202B; MATH 109 or MATH 120. Recommended: BIOL 300 or BIOL 360.
     - GEOS 656 Enr Sciences Capstone 3.0 SP
     - Prerequisites: Completion of three semesters of coursework in either the Environmental Sciences MS program or the proposed PSM option of the Environmental Sciences MS program.
     - GEOS 699P Master's Project 1.0-6.0 FS
     - Prerequisites: Instructor permission.
     - Note: GEOS 699P must be taken for at least 2 units.
     - MGMT 444 Managing Project Teams 3.0 FS
     - Prerequisites: MGMT 303 or faculty permission.

   b. **2 courses selected with advising approval from:**
     - ACCT 623 Management Control Systems 3.0 FA
     - Prerequisites: ACCT 202.
     - BADM 610 Decision Support Systems 3.0 FA
     - Prerequisites: Classified MBA student.
     - BADM 638 Bus Communication for Mgrs 3.0 Inq
     - MGMT 635 Seminar in Management 3.0 SP
     - Prerequisites: Classified MBA student.
     - MKTG 673 Seminar in Strategic Marketing 3.0 FA
     - Prerequisites: Classified MBA student.
     - POLS 660A Seminar: Public Management 3.0 FA
     - Prerequisites: POLS 602; POLS 662 is recommended.
     - POLS 660B Seminar: Pub Personnel Admin 3.0 SP
     - Prerequisites: POLS 602.
     - POLS 660C Seminar: Pub Financial Resources 3.0 SP
     - Prerequisites: POLS 602; POLS 631 is recommended.
     - POLS 669 Public & Non-Profit Prog Eval 3.0 Inq
     - Prerequisites: POLS 600 and POLS 631 or equivalents are highly recommended.
     - SCMS 607 Ops Planning & Execution 3.0 FA
     - Prerequisites: Classified MBA student.

   c. **1 course selected from:**
     - GEOS 660 Numerical Analysis 3.0 SP
     - Prerequisites: MATH 120.

   d. **MATH 615 Stat Methods for Grad Research 3.0 FA**
     - Prerequisites: MATH 105, MATH 350, MATH 315, or MATH 105 (only one is required).

   (b) 12 units selected from one of the following advising patterns:

   **Environmental Biotechnology Advising Pattern**

   **12 units selected from:**

   - BIOL 609 Applied Cellular/Molecular Biology 4.0 F2
   - Prerequisites: BIOL 409 or CHEM 451.
   - BIOL 610 Topics Cell/Molecular Biology 1.0-3.0 FS
   - Prerequisites: BIOL 609.
   - BIOL 611 Advanced Physiology/Cell Biol 4.0 F1
   - Prerequisites: BIOL 411 or BIOL 414 or BIOL 417.
   - BIOL 612 Topic Phys/Development Biology 1.0-3.0 FS
   - Prerequisites: BIOL 611.
   - BIOL 670 Plant Molecular Biology 4.0 FS
   - Prerequisites: BIOL 409.
   - CHEM 440 Environmental Chemistry 3.0 SP
   - Prerequisites: CHEM 112.
   - CHEM 445 Environmental Toxicology 2.0 SP
   - Prerequisites: CHEM 108 or CHEM 270.
   - CHEM 600 Special Topics in Chemistry 1.0-3.0 FS
   - Prerequisites: CHEM 331, CHEM 332, faculty permission.
   - GEOS 625 Adv Topic Environmental Sci 3.0 FS

   **Natural Resource Management Advising Pattern**

   **12 units selected from:**

   - BIOL 613 Methods in Population Ecology 4.0 F2
   - Prerequisites: BIOL 350.
   - BIOL 660 Landscape Ecology 3.0 FA
   - Prerequisites: BIOL 350 or GEOG 444; MATH 314 or MATH 350 or GEOG 315.
   - This course is also offered as GEOS 660.
   - BIOL 668 Community and Ecosystem Ecol 3.0 S1
   - Prerequisites: BIOL 350 and a statistics course.
   - CHEM 445 Environmental Chemistry 3.0 SP
   - Prerequisites: CHEM 112.
   - CHEM 445 Environmental Toxicology 2.0 SP
   - Prerequisites: CHEM 108 or CHEM 270.
   - GEOS 645 Pyrogeography 3.0 S1
   - Prerequisites: At least one of the following: AGRI 331, BIOL 414, BIOL 450, GEOG 343, GEOG 445, GEOG 450, PSSC 331, PSSC 333, PSSC 433, PSSC 436, PSSC 438, PSSC 446, or faculty permission.
   - GEOS 607 Environmental Planning 3.0 Inq
   - Prerequisites: BIOL 334, GEOG 427, and faculty permission.
   - GEOS 660 Landscape Ecology 3.0 FA
   - Prerequisites: BIOL 350 or GEOG 444; MATH 314 or MATH 350 or GEOG 315.
   - This course is also offered as BIOL 660.
   - GEOS 516 Natural Water Systems 3.0 F2
   - Prerequisites: CHEM 111, GEOG 315.
   - GEOS 517 The Atmospheric Environment 3.0 F1
   - Prerequisites: CHEM 112, GEOG 315.
   - GEOS 530 Environmental Sys Modeling I 3.0 F2
   - Prerequisites: CHEM 112; GEOG 330 or faculty permission; MATH 120; either PHYS 202B or PHYS 204C.
   - GEOS 535 Pollution Ecology 3.0 F2
   - Prerequisites: CHEM 112, GEOG 315.
   - GEOS 536 Applied Ecology 3.0 SP
   - Prerequisites: BIOL 350.
   - GEOS 537 Ecolohydrology 3.0 SP
   - Prerequisites: BIOL 350, GEOG 270 or GEOG 380, or instructor consent.
   - GEOS 625 Adv Topic Environmental Sci 3.0 FS

- **Sustainable Development and Technology Advising Pattern**

   **12 units selected from:**

   - BIOL 610 Topics Cell/Molecular Biology 1.0-3.0 FS
   - Prerequisites: BIOL 609.
   - CHEM 440 Environmental Chemistry 3.0 SP
   - Prerequisites: CHEM 112.
   - CHEM 445 Environmental Toxicology 2.0 SP
   - Prerequisites: CHEM 108 or CHEM 270.
   - CIVL 431 Environmental Engineering 4.0 SP
   - Prerequisites: BIOL 151 or NGCI 102; CHEM 107 or CHEM 111; MATH 109 or MATH 120; junior standing.
   - CIVL 571 Natural Sys Waste Treatment 3.0 Inq
   - Prerequisites: CIVL 431 or faculty permission.
   - CIVL 575 Solid & Hazardous Waste Mgmt 3.0 Inq
   - Prerequisites: CIVL 431 or faculty permission.
   - GEOS 530 Environmental Sys Modeling I 3.0 F2
   - Prerequisites: CHEM 112; GEOG 330 or faculty permission; MATH 120; either PHYS 202B or PHYS 204C.
   - GEOS 535 Pollution Ecology 3.0 F2
   - Prerequisites: CHEM 112, GEOG 315.
   - GEOS 570 Environmental/Engineering Geol 3.0 SP
   - Prerequisites: GEOS 102, GEOS 203, GEOS 306. For majors in related sciences and technical fields, GEOS 102 only.
Randall S. Senock, 2004, Assist Professor, PhD, Kansas State U.
Russell S. Shapiro, 2006, Assist Professor, PhD, UC Santa Barbara.
Gregory R. Taylor, 1988, Professor, PhD, U Washington.
Rachel A. Teasdale, 2004, Assist Professor, PhD, U Idaho.

**Emeritus Faculty**
Jerold J. Behne, 1968, Professor Emeritus, PhD, U Nevada.
Victor A. Fisher, 1969, Professor Emeritus, PhD, Florida State U.
Richard A. Flory, 1973, Professor Emeritus, PhD, Oregon State U.
Rolland K. Hauser, 1967, Professor Emeritus, PhD, U Chicago.
Karolyn R. Johnston, 1971, Chair, Professor Emerita, PhD, U Florida.
Robert Maurer, 1952, Professor Emeritus, PhD, Stanford U.
Tal Nahir, 1998, Assoc Professor, PhD, U No Carolina.
James L. Regas, 1969, Professor Emeritus, PhD, Harvard U.

**Geological and Environmental Sciences**

**Course Offerings**

Please see the section on “Course Description Symbols and Terms” in the University Catalog for an explanation of course description terminology and symbols, the course numbering system, and course credit units. All courses are lecture and discussion and employ letter grading unless otherwise stated. Some prerequisites may be waived with faculty permission. Many syllabi are available on the Chico Web.

**GEOS 101 General Geology**
3.0 Fa/Spr

Earth materials, processes, and history, and their significance to human-kind. No college credit for students who have passed GEOS 102. 2.0 hours activity, 2.0 hours lecture. This is an approved General Education course. Special fee required; see the Class Schedule. (004067)

**GEOS 102 Physical Geology**
3.0 Fa/Spr

Prerequisites: High school chemistry or physics is recommended; students with no previous science courses are also used to enroll in GEOS 101. No college credit for those who have passed GEOS 101. Physical and chemical processes in the earth, including origin and identification of rocks and minerals; earth's interior; movements and major features of the earth's crust; erosion and sedimentation; geological structures; topographic maps; mineral resources. 2.0 hours lecture, 3.0 hours laboratory. This is an approved General Education course. Special fee required; see the Class Schedule. (004069)

**GEOS 105 Introduction to Astronomy**
3.0 Fa/Spr

Origin and evolution of the universe. Topics include black holes, pulsars, quasars, life in the universe, and interstellar communication. Constellation study in Roth Planetarium and telescope observation of stars and galaxies at Observatory, 2.0 hours activity, 2.0 hours lecture. This is an approved General Education course. (004129)

**GEOS 120 Weather**
3.0 Fa/Spr

A descriptive study of weather processes; winds, circulation and storms; and weather impacts on life, property, crops, water availability, and air quality. Current weather briefings and California weather topics are emphasized. (004130)

**GEOS 130 Introduction to Environmental Science**
3.0 Fa/Spr

An introduction to human impact upon planet Earth. Scientific principles applied to air pollution, water pollution, and solid and radioactive waste problems. Population dynamics, world hunger, and environmental issue analysis are also covered. 2.0 hours activity, 2.0 hours lecture. This is an approved General Education course. Special fee required; see the Class Schedule. (004131)

**GEOS 130H Introduction to Environmental Science (Honors)**
3.0 Fa/Spr

Prerequisites: Acceptance into the Honors in General Education Program. An introduction to human impact upon planet Earth. Scientific principles applied to air pollution, water pollution, and solid and radioactive waste problems. Population dynamics, world hunger, and environmental issue analysis are also covered. 2.0 hours activity, 2.0 hours lecture. This is an approved General Education course. Special fee required; see the Class Schedule. (020207)
GEOS 166 Environment II: Ecosystems 2.0 Spring
Prerequisites: GEOS 165 or faculty permission
Survey of diverse ecosystems across a transect of Northern California. Studies of climate, geological materials, soils, water, plants, and animals. Three day field trip during spring break and three weekend field trips. 2.0 hours activity, 3.0 hours supervision. (020687)

GEOS 199 Special Problems 1.0–3.0 Fa/Spr
Prerequisites: Faculty permission. This course is an independent study of special problems offered for 1.0–3.0 units. You may take this course more than once for a maximum of 6.0 units. Credit/no credit grading only. (020352)

GEOS 203 Principles of Historical Geology 3.0 Fall
Prerequisites: GEOS 101 or GEOS 102.
Principles of historical geology as they relate to rock sequences and geologic maps. 2.0 hours lecture; 3.0 hours laboratory. Special fee required; see the Class Schedule. (004070)

GEOS 250 Computer Applications in Geosciences 1.0 Fa/Spr
Prerequisites: MATH 109 or MATH 120 (may be taken concurrently) or faculty permission. Develop skills in applying common computer software, including data analysis, presentation, graphics, and others. Use of this software as applied to selected problems in environmental sciences and geosciences. 2.0 hours activity. (004133)

GEOS 265 Environment III: Atmosphere, Water, and Soils 2.0 Fall
Prerequisites: GEOS 166
In-depth survey of atmospheric processes affecting climate, the hydrologic cycle, and soil systems. Interactions between these systems are examined through case studies. 1.0 hours lecture, 2.0 hours activity. (020723)

GEOS 299 Special Problems 1.0–3.0 Fa/Spr
Prerequisites: Faculty permission. This course is an independent study of special problems offered for 1.0–3.0 units. You may take this course more than once for a maximum of 6.0 units. Credit/no credit grading only. (020353)

GEOS 300 Earth System Science 3.0 Fall
Prerequisites: ENGL 130 (or its equivalent) with a grade of C- or higher; CHEM 107 or CHEM 111; PHYS 202A, PHYS 202B or PHYS 204A, PHYS 204B or PHYS 204C. An intermediate treatment of astronomy, meteorology, and oceanography, with emphasis on climate change and its impacts. This is a writing proficiency, WP, course; a grade of C- or better certifies writing proficiency for majors. (004137)

GEOS 303 Invertebrate Paleontology 3.0 Spring
Prerequisites: GEOS 203 or course in Biology. Study of main groups of invertebrate fossils and their uses in biostratigraphy, paleobiogeography, and paleoecology. 2.0 hours lecture, 3.0 hours laboratory. (004138)

GEOS 304 History of Life 3.0 Spring
Prerequisites: BIOL 101 or BIOL 108; GEOS 101 or GEOS 102.
Descriptive outline of the history of life as understood from the fossil record. Evolutionary concepts are examined, with emphasis placed upon paleontologic rather than genetic evidence. (004078)

GEOS 305 Observational Astronomy 3.0 OddFa
Prerequisites: GEOS 105 or GEOS 342.
An intermediate treatment of astronomy from an observational viewpoint. Visual, photographic, and photometric techniques for sun, moon, solar system, and deep-sky observations. Data analysis and methodology. Frequent use of campus observatory. 2.0 hours lecture, 3.0 hours laboratory. (004139)

GEOS 306 Mineralogy and Lithology 4.0 Fall
Prerequisites: GEOS 101 or GEOS 102; CHEM 107 or CHEM 111 or equivalent; or faculty permission. Identification and origins of the more common minerals and rocks. 2.0 hours lecture, 6.0 hours laboratory. Special fee required; see the Class Schedule. (004080)

GEOS 307 Stratigraphy 3.0 Fall
Prerequisites: GEOS 203 and GEOS 306 (both may be taken concurrently), or faculty permission. Basic concepts of stratigraphy. Methods of strata description, correlation, mapping, and interpretation. Sedimentary tectonics and lithic associations. Graphic representation of data. 2.0 hours discussion, 3.0 hours laboratory. (004081)

GEOS 308 Planetarium Operation 2.0 Jan
Prerequisites: GEOS 305; GEOS 405 or GEOS 406; faculty permission. Introduction to planetarium operation, including console operation, sky setting, and use of auxiliary projectors. Study of the use of the planetarium as a teaching tool. Development of planetarium programs, including the integration of Internet Resources displayed with the Roth Planetarium LCD projector. Each student will prepare an original planetarium program and present this program to an audience. 4.0 hours activity. (004157)

GEOS 309 Introductory Seismology 3.0 Spring
Prerequisites: A course in geology, physical science, or physics. Causes and effects of earthquakes; instrumental seismology; interior of the earth, seismology applied to engineering studies; fault creep and earthquake prediction. (004079)

GEOS 310 Geological Field Reconnaissance 2.0 Spring
Prerequisites: GEOS 101 or GEOS 102. Faculty permission required to take the course a second time for credit. Generalized field study of geologically noteworthy areas. Minimum of eight consecutive days in the field during January intersession or spring vacation; and additional work or classroom meetings.) You may take this course more than once for a maximum of 4.0 units. Special fee required; see the Class Schedule. Credit/no credit grading only. (004083)

GEOS 315 Pollution Chemistry 3.0 Spring
Prerequisites: CHEM 107 or CHEM 111.
A view of the environment from a chemical perspective. Principles and applications in the context of major natural and anthropogenic processes. Origins, transport and sinks of organic and inorganic contaminants in the environment. (020373)

GEOS 320 Modern Topics in the Geosciences 3.0 Fa/Spr
Recent advances in the major areas of the physical sciences, including the important interdisciplinary fields. (004162)

GEOS 321 Introduction to Meteorology 3.0 Fall
Prerequisites: MATH 120; either PHYS 202B or PHYS 204C. Survey of physical and dynamic meteorology. Topics covered include thermodynamics, radiation, clouds and precipitation formation, tropical and extratropical weather systems, forecasting, and climate change. 2.0 hours discussion, 3.0 hours laboratory. (004140)

GEOS 325 Geology of California 3.0 EvnFa
Prerequisites: GEOS 101 or GEOS 102 or consent of instructor. Geologic setting of California and historical development of its geologic provinces. The impact of earthquakes, volcanic activity, coastal erosion, and earth resources on California. Field trip required. Special fee required; see the Class Schedule. (004085)

GEOS 330 Environmental Science 3.0 Fa/Spr
Prerequisites: One course from Breadth Area B1 and one course from Breadth Area B2 of the General Education requirements.
Human impact on life-support systems; use of physical and ecological principles in environmental management and protection; discussion of land use and its environmental impact; and an evaluation of human influence on natural cycles. This is an approved General Education course. (004141)

Highlighted text indicates a change from the original publication.
GEOS 402 Optical Mineralogy 1.0 Spring
Prerequisites: GEOS 306 with grade of C- or better. Must be taken concurrently with GEOS 403.
Theory and practice of identification of minerals with the petrographic microscope. Emphasis on the common rock-forming silicates. 3.0 hours laboratory. (004096)

GEOS 403 Igneous and Metamorphic Petrology 4.0 Spring
Prerequisites: GEOS 306 with grade of C- or better. Must be taken concurrently with GEOS 402.
Physical-chemical development and geotectonic settings of igneous and metamorphic rocks. Analysis of rock thin sections. Field trip required. 3.0 hours laboratory, 3.0 hours lecture. (004097)

GEOS 405 Solar System Astronomy 3.0 OddSp
Prerequisites: PHYS 202A or equivalent, or faculty permission.
Study of planets, asteroids, meteors, and comets, including the dynamics of their orbits, the geology of their surfaces, and their origin. Study of planetary atmospheres, including their origin, evolution, dynamics and climate. Space colonies and the possible colonization of other planets will also be discussed. (004158)

GEOS 406 The Origin and Evolution of the Universe 3.0 EvnSp
Prerequisites: PHYS 202A, PHYS 202B or equivalents, or faculty permission.
Origin of the universe. Formation of galaxies and stars. Recent developments in astronomy: black holes, pulsars, quasars, radio galaxies, etc. Life in the universe. Possibility of interstellar communication with extraterrestrial civilizations. (004139)

GEOS 408 Structural Geology 4.0 Fall
Prerequisites: High school or college trigonometry; GEOS 203; GEOS 307 with grade of C- or higher.
Behavior of geologic materials. Folds, faults, small-scale structures in sedimentary, igneous, and metamorphic rocks. Graphic methods. 2.0 hours lecture, 4.0 hours activity. Special fee required; see the Class Schedule. (004082)

GEOS 410 Introduction to Watershed Hydrology 3.0 Spring
Prerequisites: GEOS 380 or prior hydrology course work and consent of instructor.
A survey of the physical processes governing the movement and storage of water at the watershed scale. Emphasis is on computer-based methods for characterizing the physical framework and quantifying the resultant hydrology in terms of its temporal and spatial variability. 2.0 hours lecture, 3.0 hours laboratory. (004161)

GEOS 415 Hydrogeology 3.0 EvnSp
Prerequisites: CHEM 111, GEOS 306, GEOS 380, MATH 120; PHYS 202A or PHYS 204A.
Recommended: GEOS 307.
Theory and analysis of groundwater flow, including fluid physics, aquifer properties, soil water, groundwater recharge, hydrogeologic environments, aquifer mechanics, and water quality degradation. 2.0 hours lecture, 3.0 hours laboratory. (004102)

GEOS 436 Volcanology 3.0 OddSp
Prerequisites: GEOS 101 or GEOS 102, GEOS 306.
An introduction to the physical processes associated with terrestrial and extraterrestrial volcanoes and their products. Specific topics include volcano monitoring, rheologic properties of magma and volcanic flows, experimental volcanology, theoretical and analog flow modeling, as well as in-depth examination of local volcanoes and various eruptions (past, present, and future). This course includes an extended (4-5 days) field trip, required for all students. Students participate in the field by collecting data for future course projects, presenting prepared information at various field trip stops, or both. Students also complete research projects throughout the semester. Special fee required; see the Class Schedule. (020293)

GEOS 440 Fundamentals in Environmental Science 3.0 Fall
Prerequisites: GEOS 250; PHYS 202B or PHYS 204B or PHYS 204C.
This course provides hands-on experience in the design, construction and use of automated data acquisition systems in the environmental and hydrogeological sciences. Primary emphasis is on the use of a laboratory workshop for actual building of systems commonly used in monitoring and characterization of air, water and land resources. 2.0 hours lecture, 3.0 hours laboratory. (020639)

GEOS 450 Tectonics 3.0 OddSp
Prerequisites: GEOS 306, GEOS 307.
Evolution of the larger features of the earth; continents, oceans, mountain ranges, and lithospheric plates. Methods of tectonic analysis, including interpretation. Geologic development of the western United States. Special fee required; see the Class Schedule. (004110)

GEOS 460 Water Resources Management 3.0 Spring
Prerequisites: Upper-division standing; GEOS 310 or GEOS 380.
Water-resources, management plans of world; emphasis on California and Israeli plans. Water plans in primitive, agrarian, and industrial societies. Data gathering and interpretation, regulation of water resources, and control of water pollution. (004168)

GEOS 471 Field Geology 2.0 Spring
Prerequisites: GEOS 360, GEOS 361, GEOS 408 (with grade of C- or higher in all courses).
Mapping, recording, and interpreting data in the field; use of Brunton compass and topographic maps emphasized. Reports required. Field work during January intersession totaling at least 10 days. You may take this course more than once for a maximum of 6.0 units. (004105)

GEOS 489T Internship in Geoscience Teaching 3.0 Fa/Spr
Prerequisites: GEOS 101 or GEOS 102, GEOS 105, GEOS 203
Corequisites: GEOS 300, GEOS 306, GEOS 307
This is a supervised internship in geoscience teaching which takes place in a local junior high or high school geoscience classroom, supervised by the classroom teacher and by a faculty member of the CSUC Department of Geological and Environmental Sciences. Credit/no credit grading only. (020620)

GEOS 490 Seminar in the Geosciences 1.0–3.0 Fa/Spr
Readings, reports, and discussion of topics in the current literature or of special studies in any area of the physical sciences. May include research project; see instructor. You may take this course more than once for a maximum of 3.0 units. (004171)

GEOS 499H Honors Research in the Geosciences 3.0 Fa/Spr
Prerequisites: First semester: A total of 9 upper-division units in the major, with at least a B average, and faculty permission. Second semester: A grade of B or higher in the first semester of the course;
An intensive two-semester course in research within a subdiscipline of the physical sciences. Students enroll for 3 units each semester. Open only to students with at least a 3.0 GPA in the major. The course consists of a research project done under the supervision of a faculty member, a formal written paper, and a public presentation. This course may be used to fulfill a maximum of 3 units of the upper-division requirement for the major. You may take this course more than once for a maximum of 6.0 units. (004176)

GEOS 501 Dynamic Meteorology and Analysis 3.0 EvnSp
Prerequisites: GEOS 400.
Theory, analysis, and forecasting of intermediate- and large-scale motions in the atmosphere. Topics include the primitive flow equations, planetary boundary layer, synoptic-scale motions, atmospheric oscillations, mesoscale circulations, and the general global circulation. 2.0 hours lecture, 3.0 hours laboratory. (004156)

GEOS 502 Air Pollution Meteorology 3.0 OddSp
Prerequisites: CHEM 112, GEOS 321 or GEOS 400, MATH 121, or faculty permission.
Physical meteorological processes relevant to air pollution with a primary focus on the atmospheric boundary layer. Topics include pollutant sources and sinks, visibility, stability, deposition and dispersion, atmospheric turbulence, plume modeling, and the design of air quality monitoring networks. (020286)

GEOS 516 Natural Water Systems 3.0 EvnFa
Prerequisites: CHEM 111, GEOS 315.
Fundamentals of processes in environmental aquatic systems emphasizing acid-base and pE-pH relationships, solubility of carbon species in natural waters, and interactions at the solid-liquid interface. (020287)

GEOS 517 The Atmospheric Environment 3.0 OddFa
Prerequisites: CHEM 112, GEOS 315.

GEOS 530 Environmental Systems Modeling I 3.0 EvnFa
Prerequisites: CHEM 112; GEOS 330 or faculty permission; MATH 120; either PHYS 202B or PHYS 204C.
Physical principles, theory and analysis techniques for computer modeling in the geosciences. Methods of estimation and error analysis, boundary values and initial conditions, steady-state and time-dependent models. Emphasis on problems relating to air and water pollution and hydrologic cycle. (004163)

<td>GEOS 630</td>
<td>Geotectonic Development of California</td>
<td>3.0 Fall</td>
<td></td>
<td>Prerequisites: Graduate standing or consent of instructor. Geotectonic and geophysical characteristics of the geomorphic provinces of California. Formation of surficial features, such as mountain ranges, drainage networks, and valleys as a response to active tectonic processes. Detailed geologic and physiographic framework of Northern California as a setting for field-based studies in the geosciences. (004185)</td>
</tr>

</table>
GEOS 640 Hydrogeochemistry 3.0 Spring
Prerequisites: CHEM 111, CHEM 112. Recommended: GEOS 365.
Origins and sources of chemical constituents of natural waters, including water-rock interactions, equilibrium aqueous speciation, reaction-path modeling, oxidation-reduction reactions, mineral solubility relations, geochemical transport, reaction kinetics, and aqueous isotopic systems. (004186)

GEOS 650 Environmental Monitoring 2.0 Fall
Prerequisites: CHEM 425 is recommended.
Survey of environmental monitoring for air quality, water quality, pollution, waste disposal, environmental resources, etc., including field and laboratory observations and exercises. An individual term project in environmental monitoring is required and may involve collection of field data, interpretation of field data, development of analytical capabilities, or other subjects pertinent to the student's research interests. 1.0 hours discussion, 3.0 hours laboratory. Special fee required; see the Class Schedule. (004187)

GEOS 652 Science and Environmental Regulations 3.0 Spring
Prerequisites: CHEM 270 or CHEM 320, MATH 120, PHYS 202B. Recommended: BIOL 350 or BIOL 360.
Examination of the scientific basis of environmental regulations, case studies. (020466)

GEOS 654 Environmental Risk Assessment 3.0 Fall
Prerequisites: GEOS 315, PHYS 202B; MATH 109 or MATH 120. Recommended: BIOL 350 or BIOL 360.
The scientific basis of risk assessment in various sectors of human activity, with particular emphasis on business, industrial, governmental agency, and planning concerns. (020467)

GEOS 656 Environmental Sciences Capstone 3.0 Spring
Prerequisites: Completion of three semesters of coursework in either the Environmental Sciences MS program or the proposed PSM option of the Environmental Sciences MS program.
Overview of environmental science issues, including biological, chemical, and engineering examples. Particular focus is on future issues and approaches. Social and ethical issues are also examined. (020465)

GEOS 660 Numerical Analysis 3.0 Spring
Prerequisites: MATH 120.
Survey and implementation of common numerical techniques in use in geoscientific data analysis, including multivariate data analysis, geostatistics, finite difference and finite element analyses, time-series analysis, and fractal geometry. (004188)

GEOS 697 Independent Study 1.0–4.0 Fa/Spr
This course is a graduate-level independent study offered for 1.0–4.0 units. You must register directly with a supervising faculty member. You may take this course more than once for a maximum of 6.0 units. (004189)

GEOS 699P Master's Project 1.0–6.0 Fa/Spr
Prerequisites: Instructor permission.
This course is a master's project offered for 1.0–6.0 units. You must register directly with a supervising faculty member. You may take this course more than once for a maximum of 6.0 units. (020469)

GEOS 699T Master's Thesis 1.0–6.0 Fa/Spr
Prerequisites: Instructor permission.
This course is a master's thesis offered for 1.0–6.0 units. You must register directly with a supervising faculty member. You may take this course more than once for a maximum of 6.0 units. (004194)

See additional Natural Science course offerings listed under Interdisciplinary Studies.
