The practice of social work actively seeks out and develops people's capacities by reaching for strengths in individuals, families, organizations, communities, and society as a whole. Social work rests on the firm belief that all people are of equal value and that every person possesses the capacity to face challenges and to grow and change. People experience “problems in living” when life presents them with challenges of an historical, institutional, interpersonal, or intrapersonal nature. The social work profession has always been in the forefront of promoting positive social change in the broader societal context, empowering our most vulnerable citizens. At both the undergraduate and graduate levels, there is a rich mix of students from various backgrounds, lifestyles and traditions which results in a diverse context for gaining the knowledge, skills, and values necessary for social work practice and working for social change.

**Our Mission**

The mission of the School of Social Work is to provide high quality social work education for generalist social work practice at the baccalaureate level, advanced practice and leadership at the master's level, and high quality general education courses. Our intent is to educate social work practitioners at both levels who are ethical, knowledgeable, and versatile in serving rural and urban areas throughout the region and state. Through collaborative efforts with community service agencies, social work professionals and organizations, the program educates social workers to become lifelong learners and culturally competent practitioners who will work to promote social and economic justice in an increasingly complex, diverse, and interconnected world.

The baccalaureate curriculum and the first year of the MSW curriculum are based upon competencies necessary for social work practice at the foundation level. The second year of the MSW curriculum prepares students for advanced social work practice. Faculty members assess students' progress in acquiring those competencies throughout their course work, including all practicums. Please refer to the undergraduate and graduate Social Work Student Handbooks on our website for more information: http://www.csuchico.edu/swrk/.

**Field Education**

Practicums are an integral part of social work education. Students are placed as interns in regional social service programs where they are provided opportunities to apply social work knowledge and skills learned in the classroom to life situations experienced by their clients. It is essential that students develop practice skills that reflect social work values and ethics. Successful completion of the field practicum requires a personal and professional commitment to these values and ethics that are the cornerstone of the profession.

**Accreditation**

The undergraduate and MSW programs are accredited by the Council on Social Work Education (CSWE) which assures students their education meets national standards for social work education at the baccalaureate and graduate level and increases their opportunities for employment.

**Scholarships**

The school offers scholarships for the BA in Social Work and the MSW programs. Students apply using the University Scholarship application which is available September through January at the Scholarship Office or from the Financial Aid Office Website at http://www.csuchico.edu/fau/. For more information please consult the school. Undergraduate scholarships for Social Work majors include the Aileen Collier Glenn, the Mary French, the Archie McDonnell, the Paul Martinson, and the Art Preciado Scholarships. They are awarded to BA-level students who have attained sophomore status or above. The master’s level scholarships include the Art Preciado, the Lois McDonald, the Paula Arts-Chomistek, and the Victor Treatment Centers Scholarships which are awarded to MSW students. The School also offers various stipend programs.

**Career Outlook**

Social work is one of the fastest growing professions in the United States. For variety, few professions can compare with social work. While social workers are employed as lobbyists, administrators, and policymakers, they frequently choose to work directly with individuals, families, and groups of people who experience problems that are economically, politically, and socially based. Social work is unique in its dedication to working with people who are economically disadvantaged. Among the settings that employ social workers are schools, hospitals, mental health clinics, private counseling services, drug and alcohol clinics, job training programs, adult and child social services, in-home services for isolated older adults or persons with AIDS, social welfare agencies, adult corrections and juvenile probation.

Professional Standards and Disqualification
The social work degree signifies readiness to begin professional work in positions requiring trust and high ethical standards. You are expected to meet the ethical and professional standards set by the profession and the practicum agencies. Should it be determined you do not meet such standards, you can be dropped from the practicum and all corequisite social work courses and, thus, be prevented from completing the social work major.

The professional standards include the following:
1. honoring the NASW Code of Ethics of the social work profession;
2. being found acceptable and receiving at least a minimum satisfactory evaluation by practicum agencies;
3. passing performance in SWRK 305, SWRK 489A, SWRK 489B, SWRK 490A, and SWRK 490B;
4. avoiding behavior that suggests potential harm to clients, colleagues, or themselves.

Please refer to the BSW Student Handbook for more complete information regarding these standards.

Federal Title IV-E Child Welfare Training Program
The undergraduate social work program is a participant in the Federal Title IV-E Child Welfare Training Program. The program provides stipends to students who commit to a minimum of two years of postbaccalaureate employment in public child welfare. Interested students should contact the SSMC Director and the Title IV-E Coordinator in the School of Social Work.

Electives Requirement:
To complete the total units required for the bachelor’s degree, select additional elective courses from the total University offerings. You should consult with an advisor regarding the selection of courses which will provide breadth to your University experience and possibly apply to a supportive second major or minor.

Grading Requirement:
All courses taken to fulfill major course requirements must be taken for a letter grade except those courses specified by the department as Credit/No Credit grading only.
By policy, students receiving less than a grade of C- in the Social Work Core and Professional Sequence may not progress in the program. You may petition the BA Director to review the application of the policy in your situation if serious and compelling conditions contributed to the poor grade. Progression in the Professional Sequence also depends on maintaining a cumulative and CSU, Chico grade point average of 2.0 and completing all prior and current required classes.

Advising Requirement:
Advising is mandatory for all majors in this degree program. Consult your undergraduate advisor for specific information.

Honors in the Major
Honors in the Major is a program of independent work in your major. It requires 6 units of honors course work completed over two semesters.

The Honors in the Major program allows you to work closely with a faculty mentor in your area of interest on an original performance or research project. This year-long collaboration allows you to work in your field at a professional level and culminates in a public presentation of your work. Students sometimes take their projects beyond the University for submission in professional journals, presentation at conferences, or academic competition. Such experience is valuable for graduate school and professional life. Your honors work will be recognized at your graduation, on your permanent transcripts, and on your diploma. It is often accompanied by letters of commendation from your mentor in the department or the department chair.

Some common features of Honors in the Major program are:
1. You must take 6 units of Honors in the Major course work. All 6 units are honors classes (marked by a suffix of H), and at least 3 of these units are independent study (399H, 499H, 599H) as specified by your department. You must complete each class with a minimum grade of B.
2. You must have completed 9 units of upper-division course work or 21 overall units in your major before you can be admitted to Honors in the Major. Check the requirements for your major carefully, as there may be specific courses that must be included in these units.
3. Your cumulative GPA should be at least 3.5 or within the top 5% of majors in your department.
4. Your GPA in your major should be at least 3.5 or within the top 5% of majors in your department.
5. Most students apply for or are invited to participate in Honors in the Major during the second semester of their junior year. Then they complete the 6 units of course work over the two semesters of their senior year.
6. Your honors work culminates with a public presentation of your honors project.

While Honors in the Major is part of the Honors Program, each department administers its own program. Please contact your major department or major advisor to apply.

Honors in Social Work is by faculty permission and open to seniors who meet the above requirements.

Students in the MSW program will demonstrate their writing competence through successful completion of either SWRK 641, Advanced Practice in Mental Health Services, or SWRK 642, Advanced Practice in Families, Children, and Youth Services during the concentration year of the program.

Graduate Grading Requirements:

Graduate Advising Requirement:
Prior to the beginning of classes, students should contact the School of Social Work office with questions regarding the MSW program and their graduate education experience. After the beginning of classes, students should contact their assigned faculty advisor.

Human Subjects in Research:
The use of human subjects in research at CSU, Chico is governed by Executive Memorandum 93-04 and by the policies of the University Human Subjects in Research Committee, which follow the Code of Federal Regulations for the protection of human subjects. If human subjects are part of the research, these regulations and policies must be complied with and proper procedures followed. For a copy of the guidelines and answers to specific questions, see the chair of the Campus Institutional Review Committee in the Office of Graduate Studies.
