Let’s continue to make LTC a Success!

Hello LTC Members! This month LTC has many more events planned. We are going to start doing some more outreach and social events, workshops, and exciting activities. We want all our members to get involved and continue to make LTC a success. One of the programs we are excited to start are Engineering Days at the Mi Casa After School Program in Gridley, CA. We are planning on volunteering our time once a month to introduce elementary through high school students to all the different disciplines of engineering. By teaching kids about engineering at a young age, we hope to spark an interest in engineering and hopefully encourage them to pursue engineering in the future. This month we are also starting the LTC Dodgeball Team called Latinos Playing Dodgeball. Go out and support our team! Finally, we are also planning a Bowling Night and an LTC hiking trip this month. The hiking trip will be an all day event so pack your lunches, get your boots ready, and let’s have some fun!

What happened in September?

Thanks to all the LTC members, the month of September was a big success. The LTC Welcome Back BBQ proved how dedicated LTC members can be. Even the pouring rain and thunder couldn’t stop everyone from enjoying some food and having a good time. The Car Wash and the Bake Sale gave LTC members a chance to work together to raise funds for the club. The Adopt-A-Freshman program is getting underway and hopefully will prove beneficial to the freshmen. The Resume Workshop was a big help for those seeking internships and jobs. Also, the Snack Room is officially up and running! So don’t forget to purchase some snacks and support LTC. So thank you to everyone that participated last month! It was amazing and hopefully we will see everyone at this month’s activities!
