

# Habitat Hunt

1. Find a spot outside to do your habitat hunt. Circle what you see in the habitat.

Trees    grass    river    flowers    insects    meadow    logs    vines  
animals    pond    lake    stream    forest    garden    potted plants  
water fountain    bird feeder    bird bath    brush piles    shrubs

2. What else do you see ?

---

3. How many different plants do you see?

4. How many different animal and insects do you see?

5. Pick an animal or insect that you see. Place an "x" in the blank space if you can point to the habitat elements this creature needs to survive.

\_\_\_\_\_ food    \_\_\_\_\_ water    \_\_\_\_\_ shelter    \_\_\_\_\_ place to raise young

**Water, food, shelter and a safe place to raise their young.**
