

Other Medical or Health Issues Documentation Guidelines

The following guidelines are provided in the interest of assuring that the documentation is appropriate to establish the student as an individual with a disability and to provide a rationale for reasonable accommodations. These guidelines are consistent with the [CSU Policy on Provision of Services to Students with Disabilities](#).

Other Functional Limitations: Any other disability, such as a dysfunction of a body part or process or a neurological disability that necessitates accommodations, support services, or programs, and that does not fall within other categories.

Verification of Other Functional Limitations:

- Documentation shall be provided by a verifying *professional qualified to assess the nature and extent of the specific medical or health impairment*.
- The letter should contain a specific diagnosis as well as description of limitations which may be engendered by the condition.
- Veterans who have a service related disability rating may submit a DD 214 form or similar as evidence of ABI in lieu of the above.

Evaluation must be current. Since assessment constitutes the basis for determining reasonable accommodations, it is in a student's best interest to provide verification that reflects current level of functioning.

Type of Documentation:

You may submit a letter from your physician on letterhead stationery which addresses the areas above or you may choose to use the [Disability Verification form](#).
