Emergency Preparedness - Personal Responsibility for Persons with Disabilities

Before an Emergency:

• Familiarize yourself with the University Emergency Preparedness web page information and the University Emergency Action Plan.

• Determine for yourself, or with the assistance of Accessibility Resource Center (ARC), or the Floor Evacuation Coordinator nearest you, what (if any) adaptations to the building's evacuation plan will be needed.

• Become familiar with important locations in each building you enter: exits, stairways, and designated Temporary Rescue Areas. A list of Temporary Rescue Areas for each campus building is available on the EHS website.

• Each building has floor evacuation coordinators who are trained to assist you if needed and are aware of the designated rescue areas where you can take shelter if you are unable to exit the building.

• Ask several reliable people in your classes, residence halls, or workplace to assist you in case of an emergency and instruct them in the best way to do so.

During an Emergency:

• Call campus police immediately (530-898-5555 or 911), provide the location and type of assistance needed. If you move from the given location, notify campus police.

• Move as quickly as you can toward the nearest safe exit or Temporary Rescue Area. Do not attempt to use the elevator!

• If you are unable to exit the building without assistance, move to a designated Temporary Rescue Area to await rescue. The Floor Evacuation Coordinator will advise first responders (Fire and police) of your location. Your rescue will be a priority.

• Notify others in your location of your need for assistance.

• If unable to speak or speak loudly, carry a whistle or have other means of attracting the attention of others.

• If danger is imminent, individual should ask for help evacuating the building.
