Target Stores  
413 Headquarters Lane  
Denver, CO 98553

Dear College Recruiters:

I recently attended a Career Fair at California State University, Chico that Target Stores attended, and I was very interested in the summer internship program. Last summer I completed an internship with Target at the T-555 Distribution Center located in Woodland, CA. I thoroughly enjoyed my experience in your unique, fast-paced company and would like to continue along the path to having a career within the Target Corporation.

As an upcoming college graduate, I have done extensive research on companies that are currently hiring. This research has only reinforced my desire to work for Target when I graduate. I thrive on being pushed outside of my comfort zone and being challenged on a daily basis. The way Target focuses on the leadership development of their executives and the continuous dedication to community involvement makes it the perfect fit for me. I know that Target could benefit from my strong work ethic, my passionate drive to partner with others and desire for effective teamwork. I received positive feedback from my work in the Distribution Center last summer, and I know that I could do the same store-side.

I was an excellent addition to the Target Team (in the D.C.) and I am confident that my previous supervisor, the MBP Senior Group Leader Susie Jones, would tell you the same. I brought to this position a wide-range of leadership experience and true determination which I would enthusiastically bring to the Target stores. Meeting me in person will convince you that I would be just as valuable to your Stores Division. I look forward to hearing from you soon!

Sincerely,

Anita Career
