Interdisciplinary REU - Research Experiences for Undergraduates in the Structure and Function of Proteins

Student participants will be engaged in a ten-week period of hands-on experimental training and independent investigation in the areas of biochemistry, biophysics, computational chemistry, enzymology, molecular biology and plant biology. The majority of the research projects featured in this program involve studies of the structure and function of proteins.

In addition to the research experience, students will participate in a series of weekly enrichment seminars focusing on scientific communication, graduate school admissions and scientific career options.

Participant benefits:
- $5750 stipend
- On-campus housing
- $900 meal allowance
- $500 travel allowance

Must be a U.S. Citizen or Permanent Resident to apply. UM-Ann Arbor students are ineligible for participation.

Undergraduate students majoring in biochemistry, biology, biophysics, chemistry, computer science, engineering (chemical/biomedical), mathematics or a related discipline will be eligible for participation in the program.

Applications are available online at: http://pharmacy.umich.edu/reu.
