

# *Sacramento River Floodplain Ecology Institute*

*July 27-29, 2015 + 1 day in fall: Oct 10, 2015*

*For K-12 Teachers (with breakouts by grade band)*

*Water issues impact much more than human usage.  
Learn how the entire watershed system is affected  
by human activities and rainfall patterns, as well as the  
ecosystem services provided by floodplains.*

**Next Generation Science and Engineering Standards and Project Based Learning**

## **Program Features**

- A. Instructional Materials:** Handouts and lesson plans, the excellent new Project WET curriculum guide
- B. Raft Trip on the Sacramento River:** study restoration of the river and the impact of flood control designs
- C. Network:** priceless contacts and valuable connections to other teachers and community partners
- D. Common Core:** Standards in English Language Arts will be integrated throughout; reading comprehension strategies, academic writing and discourse for EL will be included using adopted instructional materials.

**Teacher Stipend \$200** for all days/fall included (must attend all days – stipend is not prorated).

**Registration fee = \$50**

2 units of credit available for purchase (\$60/ea).
