Update to Mask Requirements

Beginning Saturday, March 12th, Chico State Enterprises will be aligning with campus and change the in-person mask mandate for employees from **required** to **optional**. This decision is based on the low cases on campus, high vaccination rate, and the fact that Butte County has moved into the medium risk category.

Please be aware that this does not necessarily mean masks will not be mandated in some settings when working in higher risk environments with vulnerable populations. Some grant/contract funders may still require masks for in-person work. Please check with your Director or Manager for additional guidance.
