

RESP and FND Announcements
Transition of IT Services
June 20, 2019

As we have communicated, campus Information Technology Support Services (ITSS) will be providing IT support for the Research Foundation. ITSS will begin providing services effective July 1, 2019. Scott Kodai, Director of ITSS, will soon be introducing the team that will be responsible for supporting Research Foundation needs. Scott and his team will also be organizing informational sessions to review the IT services that ITSS offers and will be creating a Research Foundation ticket option on the campus ticketing system.

Over the next weeks, please watch for additional communications about informational session opportunities, ITSS support staff, and the ticketing process.

Thank you.

Foundation Administration
