This publication includes deadline dates for the month of July 2020 and late announcements for the months of June 2020 and May 2020. Proposals submitted by a referenced target date will be included in a particular review cycle, while those received after the target date will be held for the next review cycle. It is advisable to contact the program staff cited in each listing to obtain all available information.

Those deadlines marked by an asterisk (**) are tentative. In some cases, these are specific dates that may change depending on the timing of the deadline notices and in others, we have listed just the month during which a deadline is expected. Deadlines marked by a double plus sign (++) are target dates.

**Program:** Sedimentary Geology and Paleobiology (SGP)

**Agency:** National Science Foundation

**Next Deadline:** Jul 2020 *(target date)*

Supports research that addresses the deep-time sedimentary crust and advances our understanding of environmental and evolutionary change. Focus areas include: the changing aspects of life, ecology, environments, and biogeography in geologic time; sedimentary lithosphere; geological processes and resources in rock sequences; dating and measuring the sequence of events and rates of geological processes; and the geologic record of the production, transportation, and deposition of modern and ancient physical and chemical sediments. **Program:** Geobiology and Low-Temperature Geochemistry

**Agency:** National Science Foundation

**Next Deadline:** Jul 2020 *(target date)*

Supports research on geochemical processes in terrestrial Earth’s surface environmental systems, as well as the interaction of geochemical and biological processes. Studies may address: inorganic and/or organic geochemical processes occurring at or near the Earth’s surface now and in the past, and across the broad spectrum of interfaces ranging in scale from planetary and regional to mineral-surface and supramolecular; the role of life in the transformation and evolution of Earth’s geochemical cycles; surficial chemical and biogeochemical systems and cycles, including their modification through environmental change and human activities; low-temperature aqueous geochemical processes; mineralogy and chemistry of earth materials; geomicrobiology and biominerlization processes; and medical mineralogy and geochemistry. Program: Petrology and Geochemistry
Agency: National Science Foundation
Next Deadline: Jul 2020 (target date)
Supports basic research on the formation and evolution of Earth using petrological and geochemical characteristics of Earth materials in the crust, mantle, and core. Proposals generally address the petrology and high-temperature geochemistry of igneous and metamorphic rocks, mineral physics, economic geology, and volcanology. Proposals that bridge disciplinary boundaries or include development of analytical tools for potential use by the broad community encouraged. Annual deadlines: Proposals are accepted anytime. Program: Ceramics (CER)
Agency: National Science Foundation
Next Deadline: Jul 2020 (target date)
Supports fundamental research in ceramics (e.g., oxides, carbides, nitrides, and borides), glasses, ceramic-based composites, and inorganic carbon-based materials to increase fundamental understanding and develop predictive capabilities for relating synthesis, processing, and microstructure of these materials to their properties and ultimate performance in various environments and applications. Projects should be experiment centered; inclusion of computational and theory components are encouraged. Annual deadline: proposals accepted any time; however, PIs are advised that the following dates -- March 15 to May 15 and July 15 to Aug. 15 -- should, optimally, be avoided for submissions. Program: The Science of Learning and Augmented Intelligence Program (SL)
Agency: National Science Foundation
Next Deadline: Jul 08, 2020
Supports potentially transformative research that develops basic theoretical insights and fundamental knowledge about principles, processes and mechanisms of learning, and about augmented intelligence - how human cognitive function can be augmented through interactions with others, contextual variations, and technological advances. The program also supports research addressing learning in individuals and in groups, across a wide range of domains at one or more levels of analysis including: molecular/cellular mechanisms; brain systems; cognitive, affective, and behavioral processes; and social/cultural influences. Annual deadlines: third Wednesday in January and second Wednesday in July. See https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505731

Agency: National Science Foundation
Next Deadline: Jul 15, 2020
Supports basic research that increases our understanding of cognitive, linguistic, social, cultural, and biological processes related to human development across the lifespan. Research supported by this program will add to our knowledge of the underlying developmental processes that support social, cognitive, and behavioral functioning, thereby illuminating ways for individuals to live productive lives as members of society. Currently accepting individual investigator and workshop/small conference proposals. Annual deadlines: target dates are 1/15 and 7/15.
