**Deadlines**  
 Funding Expertise. Personally Delivered.

November 01, 2021

This publication includes deadline dates for the month of February 2022 and late announcements for the months of January 2022 and December 2021. Proposals submitted by a referenced target date will be included in a particular review cycle, while those received after the target date will be held for the next review cycle. It is advisable to contact the program staff cited in each listing to obtain all available information.

**Those deadlines marked by an asterisk (\*\*) are tentative. In some cases, these are specific dates that may change depending on the timing of the deadline notices and in others, we have listed just the month during which a deadline is expected. Deadlines marked by a double plus sign (++) are target dates.**

**Agency:** National Science Foundation

**Next Deadline:** Feb 15, 2022

Supports efforts to bring together researchers in formal methods with researchers in other areas of computer and information science and engineering to jointly develop rigorous and reproducible methodologies for designing and implementing correct-by-construction systems and applications with provable guarantees. Funds support close collaboration between researchers in formal methods, and researchers in the "field" in the following areas: computer networks, cyber-human systems, distributed/operating systems, hybrid/dynamical systems, and machine learning. Funds support two tracks: Research proposals; and Transition to Practice proposals. See [https://www.nsf.gov/funding/pgm\\_summ.jsp?pims\\_id=505518](https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505518) for details.

**Program:** National Robotics Initiative 2.0:  
Ubiquitous Collaborative Robots  
(NRI-2.0)

**Agency:** National Science Foundation

**Next Deadline:** Feb 22, 2022

Supports innovative robotics research and applications emphasizing the realization of collaborative robots (co-robots) acting in direct support of and in a symbiotic relationship with human partners. The focus of the current program is on ubiquity, which in this context means seamless integration of co-robots to assist humans in every aspect of life. Also focuses on understanding long term social, behavioral and economic implications of co-robots across all areas of human activity. Collaboration between academic, industry, non-profit and other organizations is strongly encouraged. Topics may be related to NASA, USDA, NIH, DOD, DOE and NSF.
